

Table of Contents

Nomenclature	xvii
1 Introduction	1
2 State of Knowledge	5
2.1 Phenomena of Bubbly Flows	5
2.1.1 Bubble Formation	7
2.1.2 Bubble Shapes and Rise Behaviour	8
2.1.3 Sauter Mean Diameter and Bubble Size Distributions	12
2.2 Phenomena of Mass Transfer	14
2.2.1 Two-Film Theory	14
2.2.2 Mass Transfer Measurements in Practice	17
2.3 Dimensionless Numbers and Buckingham Π Theorem	18
2.4 Loop Reactors and their Fluid Dynamics	19
2.4.1 General Introduction to Loop Reactors	19
2.4.2 Design and Characteristics of Jet Loop Reactors	23
2.4.3 Fluid Dynamic Description of Single-Phase-Operated JLRs	29
2.4.4 Fluid Dynamic Description of Multiphase-Operated JLRs	41
2.4.5 Scaling of Jet Loop Reactors	49
3 Experimental Setups and Scale Down	53
3.1 X-Scaling Approach and its Implementation	53
3.2 Description of the Pilot-Scale Jet Loop Reactor Setup	56
3.3 Laboratory-Scale Jet Loop Reactor Setup Design	60
3.3.1 Design and Scaling Parameters	60
3.3.2 Description of the Laboratory-Scale Jet Loop Reactor	62

Table of Contents

3.4	Material System and Operating Parameters	68
4	Results of the Standard Characterisation for the X-Scaling Approach	73
4.1	Employed Measurement and Evaluation Methods	73
4.1.1	Determination of Gas Hold-Ups	73
4.1.2	Determination of Bubble Size Distributions	74
4.1.3	Determination of Mass Transfer Coefficients	76
4.1.4	Determination of the Stability of the Loop	77
4.2	Characterisation Results	79
4.2.1	Gas Hold-Ups	79
4.2.2	Sauter Mean Diameters and Bubble Size Distributions	84
4.2.3	Volumetric Mass Transfer Coefficients	91
4.2.4	Stability of the Loop	93
4.3	Integration into the X-Scaling Approach and the Transfer of the Process . . .	96
5	Extended Investigations and Results for the X-Scaling Approach	97
5.1	Two-Phase Operated Nozzle and Pressure Loss	98
5.1.1	Changes to the Laboratory Setup	98
5.1.2	Investigation of the Pressure Loss over Different Nozzles	99
5.1.3	Results for the Pressure Losses over the Different Nozzles	104
5.2	Determination of Circulation Gas	109
5.2.1	Balancing with the Optical Method	109
5.2.2	The Gas Residence Time Method	116
5.3	Implementation and Investigation of a Side Sparging Device	133
5.3.1	Design of the Side Sparging Device	133
5.3.2	Investigation of the Side Sparging Device	136
5.3.3	Results of the Investigation of the Side Sparging Device	136
6	Conclusion	141
7	Outlook	145
	Bibliography	147
	Appendix A	155
