

Table of Contents

Title Page	i
Abstract	iii
Zusammenfassung	vii
List of Figures	xxi
List of Tables	xxix
1 Introduction	1
1.1 Motivation	1
1.2 Overview of state-of-the-art of broad area laser	3
1.3 Method and structure of this thesis	7
2 High power, high efficiency diode lasers fundamentals	11
2.1 Introduction to GaAs-based broad area diode lasers	11
2.2 Mathematical description of broad area diode laser performance	17
2.2.1 1D drift-diffusion equations	18

2.2.2	Balance equations for the QW	18
2.2.3	Rate equations and threshold gain	19
2.2.4	Optical loss	21
2.2.5	Capture model	21
2.2.6	Power-voltage-current	23
2.2.7	Power conversion efficiency	26
2.2.8	Temperature sensitivity	26
2.3	Simulation tools	29
2.4	Measurement techniques	29
3	Vertical design development for higher power and efficiency	35
3.1	High power, low modal gain optimized vertical designs	36
3.1.1	Design considerations and description	36
3.1.2	Experimental results	39
3.2	High modal gain vertical designs	47
3.2.1	Design description	47
3.2.2	Realization of high modal gain designs	52
3.2.3	Performance of high modal gain devices with different front facet reflectivities	55
3.2.4	Impact of high modal gain on power, T_0 and T_1	63
3.3	Conclusion	77
4	Diagnosis and analysis of capture-escape effects on laser performance	79

TABLE OF CONTENTS	xix
4.1 Impact of capture time on the series resistance	80
4.1.1 Performance of symmetric waveguide designs at low temperature	82
4.1.2 Root cause analysis of the measured excess series resistance at low temperature	90
4.2 Impact of capture time on power saturation	102
4.2.1 Performance of highly asymmetric designs at room temperature under pulse condition	103
4.2.2 Comparison of measurement and simulation result for power saturation at high bias	108
4.2.3 Conclusion	121
5 Summary and outlook	123
5.1 Optimized vertical design for high power and efficiency	124
5.2 Analysis of capture-escape effects on laser performance	127
5.3 Outlook	128
References	131
Appendix A	141
A.1 Full wafer processing	141
A.2 Short loop process	143
A.3 Facet passivation and coating	143
