
Contents

1	Introduction	1
2	Longitudinal single mode operation of laser diodes	5
2.1	Fabry-Perot type lasers	5
2.2	Externally stabilized and Distributed Bragg lasers	6
2.3	Distributed feedback lasers	7
3	Methods for modeling laser diodes	13
3.1	Stationary model based on coupled-wave equations	13
3.2	Time-dependent model based on traveling-wave equations	15
3.2.1	BALASER - Optical model	15
3.2.2	BALASER - Carrier transport model	16
3.2.3	BALASER - Thermal model	17
3.2.4	BALASER - Simulation domains and parameters	18
3.3	Model for spontaneous emission spectra	18
4	Experimental setup for the analysis of single-mode laser diodes	19
4.1	Characterization of the spectral behavior	19
4.2	Characterization of output power and polarization	24
4.2.1	Optical output power characterization	24
4.2.2	Characterization of the degree of polarization	25
4.3	Chapter summary	27
5	Distributed feedback lasers with highly reflective rear facet	29
5.1	Tuning behavior by injection current	29
5.1.1	Simulation of the tuning behavior	30
5.1.2	Experimental analysis of the tuning behavior	37
5.2	Influence of the mounting technology on the emission characteristics	40
5.2.1	Spectral characteristics	41
5.2.2	Optical output power and polarization characteristics	53
5.3	Integration of a variable phase section at the rear facet	57
5.3.1	Analysis of the tuning behavior	59
5.3.2	Analysis of the output power characteristics	62

5.4	Chapter summary	66
6	Distributed feedback lasers with anti-reflective coated facets	69
6.1	Realization of quarter-wave phase shifts in second order gratings	70
6.2	Test of quarter-wave phase shifted DFB lasers above threshold	73
6.2.1	Lasers with straight waveguide	73
6.2.2	Lasers with tilted waveguide	77
6.3	Chapter summary	84
7	Conclusions and outlook	87
7.1	DFB lasers with highly reflective rear facet	87
7.2	DFB lasers with anti-reflective coated facets	89
	Appendices	91
A	Experimental parameter extraction for diode lasers	91
B	Reflection coefficients of resonators	93
C	Parameter lists for simulations	95
C.1	Reflections from measurement setup	95
C.2	Tuning behavior DFB lasers	98
C.3	Strained DFB lasers	101
C.4	DFB lasers with adaptable phase section	102
C.5	DFB lasers with QWPS	103
	List of abbreviations	105
	List of publications	107
	Bibliography	109
