

Contents

1	Introduction	1
1.1	State of the Art	2
1.2	Goals and Content of this Work	3
2	Fundamentals	5
2.1	Electromagnetic Waves	5
2.1.1	Field Regions and Plane Waves	5
2.1.2	Polarization	7
2.1.3	Scattering Behaviour	7
2.2	Radar Basics	8
2.2.1	FMCW Radar	9
2.2.2	Distributed Radar	12
2.2.3	Array Processing	13
2.2.4	Signal Processing	16
2.2.5	Radar Parameters	17
2.2.6	Radar Cross Section	18
2.2.7	Automotive Radar	20
2.2.8	Simulation Environment	21
2.3	Radar Modules	22
2.3.1	AWR2243BOOST	22
2.3.2	AWR2544LOPEVM	23
3	Elevation Resolution	25
3.1	Bistatic Elevation Radar	25
3.1.1	Measurement Setup	26
3.1.2	Measurement Results	27
3.2	Engine Hood Reflection	29
3.2.1	Geometrical Analysis	29
3.2.2	Simulative Analysis	32
3.2.3	Measurements	37
3.3	Concluding Remarks on Elevation Resolution	41
4	Synchronization of Distributed Radar Systems	43
4.1	Signal Model	43
4.2	Synchronization	44
4.2.1	Simplex Synchronization	44

4.2.2	Duplex Synchronization	45
4.2.3	Consecutive Downconversion Synchronization	46
4.2.4	Multistatic	46
4.2.5	Calibration	49
4.2.6	Correction	50
4.3	Simulation	50
4.3.1	Basic Effects	51
4.3.2	Synchronization	56
4.4	Measurements	63
4.4.1	Measurement Setup	63
4.4.2	Short-Range	66
4.4.3	Baseline Offset	69
4.4.4	Long-Range	70
4.4.5	Multistatic	72
4.5	Concluding Remarks on Synchronization	74
5	Distributed Array Design and Processing	77
5.1	Distributed Array Design	77
5.1.1	AWR2544LOPEVM	78
5.1.2	Fixed Element Position	79
5.1.3	Variable Element Position	80
5.2	Near-Field Effects	81
5.2.1	Signal Model	82
5.2.2	Compensation	82
5.2.3	Simulation	83
5.3	Compressed Sensing	90
5.3.1	Simulation	90
5.3.2	Measurement	96
5.4	Radar Cross Section in Distributed Radar Systems	97
5.4.1	Far-Field Condition	97
5.4.2	Simulation of Interference Effects	99
5.5	Concluding remarks on Distributed Array Design and Processing	102
6	Conclusion	105
	List of Symbols	107
	List of Acronyms	109
	Bibliography	111
	Own Publications	119
