

Table of contents

1. Introduction	1
2. Review of literature	3
2.1 Flexural limb deformities of the metacarpo- /metatarsophalangeal and distal interphalangeal joints in foals	3
2.2 Tendon structure and composition	6
2.3 Oxytetracycline in the treatment of flexural limb deformities	8
2.4 Matrix metalloproteinase inhibitors	10
2.5 Lathrogenic agents	12
3. Results	15
3.1 Publication	15
3.2 Manuscript	25
4. Overall Discussion	49
4.1 Oxytetracycline for the treatment of flexural limb deformities – What did we learn?	49
4.2 Promising substances as alternatives to oxytetracycline in the treatment of flexural limb deformities	50
4.3 Choice of method – the <i>in-vitro</i> -steps to an alternative	52
4.4 Conclusion	56
5. Summary	57
6. Zusammenfassung	61
7. References	65
Acknowledgments	79
