Introduction	1
1 Matrix-Envelope-Inclusion Composite	3
1.1 Model System	3
1.2 Coordinate System	5
2 Mechanics of Elastic Solid Continuum	9
2.1 Fundamental Equations	9
2.2 Elastic Energy	11
2.3 Reason of Stresses	12
2.4 Boundary Conditions	17
2.4.1 Matrix	17
2.4.2 Envelope	18
2.4.3 Inclusion	19
2.4.4 Stress-Field Interactions	19
2.4.5 Analysis of Solutions	21
3 Mathematical Model 1	23
3.1 Mathematical Procedure	23
3.2 Condition $\beta_{IN} \neq \beta_E \neq \beta_M$	24
3.2.1 Matrix	24
3.2.2 Envelope	26
3.2.3 Inclusion	29
3.3 Condition $\beta_{IN} \neq \beta_E = \beta_M$	31
3.3.1 Matrix	31
3.3.2 Envelope	32
3.4 Condition $\beta_{IN} = \beta_E \neq \beta_M$	33

3.4.1	Envelope	34
3.4.2	Inclusion	35
4	Mathematical Model 2	37
4.1	Mathematical Procedure	37
4.2	Condition $\beta_{IN} \neq \beta_E \neq \beta_M$	40
4.2.1	Matrix	40
4.2.2	Envelope	49
4.3	Condition $\beta_{IN} \neq \beta_E = \beta_M$	57
4.3.1	Matrix	57
4.3.2	Envelope	63
4.4	Condition $\beta_{IN} = \beta_E \neq \beta_M$	64
5	Mathematical Model 3	67
5.1	Mathematical Procedure	67
5.2	Condition $\beta_{IN} \neq \beta_E \neq \beta_M$	70
5.2.1	Matrix	70
5.2.2	Envelope	81
5.3	Condition $\beta_{IN} \neq \beta_E = \beta_M$	89
5.4	Condition $\beta_{IN} = \beta_E \neq \beta_M$	96
6	Mathematical Model 4	99
6.1	Mathematical Procedure	99
6.2	Condition $\beta_{IN} \neq \beta_E \neq \beta_M$	100
6.2.1	Matrix	100
6.2.2	Envelope	108
6.2.3	Inclusion	114
6.3	Condition $\beta_{IN} \neq \beta_E = \beta_M$	115
6.3.1	Matrix	116
6.3.2	Envelope	122
6.4	Condition $\beta_{IN} = \beta_E \neq \beta_M$	123
6.4.1	Envelope	123
6.4.2	Inclusion	124
7	Mathematical Model 5	125
7.1	Mathematical Procedure	125
7.2	Condition $\beta_{IN} \neq \beta_E \neq \beta_M$	127
7.2.1	Matrix	127
7.2.2	Envelope	136
7.3	Condition $\beta_{IN} \neq \beta_E = \beta_M$	141

7.3.1	Matrix	142
7.4	Condition $\beta_{IN} = \beta_E \neq \beta_M$	150
