

Table of Contents

Nomenclature	xv
1 Introduction	1
2 Fundamentals and State of the Art	5
2.1 Fundamentals of Stirred Tank Reactor Design	5
2.2 Fundamentals of Mixing and Dispersion in Stirred Tank Reactors	11
2.3 Fundamentals of Numerical Bioreactor Characterisation	19
2.3.1 Fundamentals of Numerical Flow Simulation	19
2.3.2 Lattice Boltzmann Large Eddy Simulations	22
2.3.3 Lagrangian Lifelines for Cell-Level Flow Characterisation	29
2.3.4 Numerical Determination of Mixing Times	37
2.3.5 Flow Structure Identification via Finite Time Lyapunov Exponents Analysis	41
2.4 Fundamentals of Bioreactor Scale-Down Approaches	44
2.5 Summary and Outlook on Fundamentals	46
3 Experimental and Numerical Designs and Procedures	49
3.1 Experimental and Numerical Characterisation Strategy for an Industrial 15 m ³ Stirred Tank Reactor	49
3.1.1 pH Sensitive Tracer-Based Decolourisation Experiments	50
3.1.2 Conductivity-Based Tracer Measurements for Mixing Analysis	51
3.2 Numerical Setup and Simulation Scheme for 15 m ³ STR	52
3.2.1 Volumetric Flow Field Scheme and Mixing Structure Analysis	54
3.2.2 Numerical Mixing Time Determination	54
3.2.3 Implementation of Lagrangian Cell Lifelines	55
3.3 Numerical Framework for the Single Multi-Compartment Bioreactor System	56
3.4 Post-Processing and Data Evaluation Strategy	58

Table of Contents

4	Experimental and Numerical Results and Discussion	59
4.1	Experimental Characterisation of the 15 m ³ Stirred Tank Reactor	59
4.1.1	Global Mixing Time Determination via Local Sensor Probes	60
4.1.2	Global and Local Mixing Time Determination via Decolourisation	62
4.2	Numerical Characterisation of the Industrial STR	66
4.2.1	Numerical Determination of Mixing Times and Experimental Validation of the Numerical Approach	67
4.2.2	Mixing Structure Analysis via Finite Time Lyapunov Exponents	70
4.2.3	Characterisation of Mixing through Cell Lifelines	77
4.3	Evaluation of Scale-Down Performance of the Single Multi-Compartment Bioreactor	94
4.3.1	Mixing Structure Analysis of SMCB via Finite Time Lyapunov Exponents	95
4.3.2	Characterisation of Mixing in the Single Multi-Compartment Bioreactor through Cell Lifelines	98
5	Conclusion	107
	Bibliography	111
	Appendix A Experimental Protocols	119
A.1	Decolourisation Experiments	119
A.2	Conductivity Experiments	120
