

Table of Contents

Table of Contents	i
List of Figures	vii
List of Tables.....	ix
Abstract	xi
1 Introduction	1
1.1 Objectives.....	4
1.2 State-of-the-art	5
1.2.1 Traditional ROP Prediction Models.....	5
1.2.2 Machine Learning Methods for ROP Prediction.....	6
1.2.3 Optimization Algorithms in Drilling Engineering	6
1.2.4 Uncertainty Quantification and Intelligent Drilling Systems.....	6
1.3 Thesis Outline	7
2 Drilling Big Data and Process of Machine Learning	10
2.1 Drilling Big Data Acquisition	10
2.1.1 Integrated Logging Unit	11
2.2.2 Drilling Parameter Recorder	12
2.2.3 Acquisition of Other Drilling Data.....	12
2.2 Transmission of Drilling Big Data	13
2.2.1 Wired Transmission Technology	13
2.2.2 Wireless Communication Technology	14
2.2.3 Implications for Machine Learning-Based ROP Modeling	15
2.3 Drilling Big Data Storage.....	15
2.3.1 Distributed Storage Architecture Based on Hadoop	16
2.3.2 Cloud Storage Technology.....	17
2.4 General Research Process in Machine Learning.....	18
2.4.1 Problem Definition.....	18

2.4.2	Data Collection and Preprocessing	19
2.4.3	Model Selection.....	20
2.4.4	Model Training and Hyperparameter Optimization.....	20
2.4.5	Model Evaluation	21
2.4.6	Model Improvement and Iterative Optimization.....	21
2.4.7	Final Testing and Generalization Assessment	21
2.4.8	Model Deployment.....	22
2.4.9	Monitoring and Maintenance	22
2.5	Chapter Summary.....	22
3	Data Processing and Analysis	24
3.1	Drilling Data Processing Framework.....	24
3.1.1	Abnormal Data Analysis	24
3.1.2	Drilling Data Selection.....	24
3.1.3	Drilling Data Cleaning	25
3.1.4	Drilling Data Normalization.....	26
3.1.5	Correlation Analysis of Drilling Data and Input Parameter Selection.....	28
3.2	Dataset Description and Variable Definition	29
3.2.1	Data Source and Well Overview	29
3.2.2	Definition of Input and Output Variables	30
3.3	Removal of outliers	31
3.3.1	Impact of Outliers on Machine Learning Modeling.....	31
3.3.2	Conventional Outlier Detection Methods	32
3.3.3	Sequence Autoencoder Outlier Detection	36
3.4	Evaluation of Outlier Detection Methods	38
3.4.1	Experimental Framework and Research Design	38
3.4.2	Backpropagation Neural Network Model	39
3.4.3	Influence of Outlier Removal on Data Structure	40

3.4.4	Prediction Performance and Error Structure Analysis	43
3.5	Chapter Summary	46
4	Optimization of ROP Prediction Models with Integrated Logging Information	47
4.1	Problem Statement and Research Framework	47
4.2	Logging Data Integration and Feature Construction	49
4.2.1	Necessity of Incorporating Logging Information	49
4.2.2	Alignment Method for Drilling Parameters and Logging Data	51
4.2.3	Multi-Source Data Fusion Based on Depth Indexing	52
4.2.4	Construction of the Input Feature System with Logging Information	52
4.3	Optimization Methods for ROP Prediction Models with Integrated Logging Information	53
4.3.1	Formulation of the BP Neural Network Parameter Optimization Problem	53
4.3.2	PSO-BP Optimization Model	56
4.3.3	GWO-BP Optimization Model	57
4.3.4	WOA-BP Optimization Model	58
4.4	Comparative Analysis of the Predictive Performance of Different Optimized Models	59
4.4.1	Evaluation Metrics and Experimental Settings	59
4.4.2	Comparison of Predictive Accuracy of Different Optimized Models	60
4.5	Statistical Significance and Stability Analysis of the Optimized Models	64
4.5.1	Statistical Significance Analysis Based on the Friedman Test	64
4.5.2	Post-hoc Comparison Based on the Nemenyi Test	65
4.5.3	Stability Analysis Under Repeated Experiments	66
4.6	Convergence, Efficiency, and Robustness Analysis of the Optimized Models	70
4.6.1	Convergence Behavior Analysis	70
4.6.2	Computational Efficiency Analysis	72
4.6.3	Robustness Analysis under Different Training Sample Ratios	73

4.7	SHAP-Based Interpretability Analysis of the Model	78
4.7.1	Principle of the SHAP Method	78
4.7.2	Global Feature Importance Analysis	79
4.7.3	Analysis of the Influence Patterns of Key Features	81
4.8	Chapter Summary	88
5	Uncertainty Quantification and Engineering Analysis of ROP Prediction	90
5.1	Baseline Uncertainty Estimation Methods and Problem Analysis	92
5.1.1	Theoretical Basis of Machine-Learning-Based Uncertainty Estimation for ROP Prediction	93
5.1.2	MC Dropout and Bootstrap Methods	94
5.1.3	Comparison of Baseline Results and Problem Identification	97
5.2	Interval Optimization Method Based on Conformal Calibration for Bootstrap-GWO-BP	100
5.2.1	Asymmetric Conformal Calibration Method	101
5.2.2	Risk-Stratified Interval Optimization Strategy	102
5.2.3	Method Workflow and Implementation Procedure	103
5.3	Evaluation Metrics and Results Analysis of Prediction Intervals	105
5.3.1	Evaluation Metric System	105
5.3.2	Comparison of Different Methods under the 90% Nominal Coverage Level	108
5.3.3	Interval Performance Analysis across Different Risk Levels	110
5.3.4	Engineering Applicability Comparison between the 90% and 95% Intervals	112
5.4	Chapter Summary	114
6	Risk-Aware Optimization of Drilling Parameters for ROP Improvement	116
6.1	Optimization Problem Formulation	117
6.1.1	Definition of Decision Variables	118
6.1.2	Formulation of the Objective Function	119
6.1.3	Engineering Constraints	119

6.2	Risk Metrics and Optimization Strategies.....	121
6.2.1	Construction of Risk Metrics Based on Predictive Uncertainty	122
6.2.2	Principles for Selecting the Risk Weight Parameter	123
6.2.3	Differentiated Optimization Strategies Based on Risk Stratification.....	124
6.3	Optimization Results and Discussion.....	124
6.3.1	Comparative Analysis of Drilling Performance Before and After Optimization 125	
6.3.2	Analysis of Post-Optimization Parameter Variation Patterns	128
6.3.3	Analysis of Optimization Performance Across Different Risk Levels	131
6.3.4	Sensitivity Analysis of the Risk-Weight Parameter.....	134
6.4	Engineering Implications and Decision Support.....	138
6.5	Chapter Summary.....	142
7	Intelligent Decision Support System for Data-Driven ROP Prediction and Risk-Aware Drilling Optimization	145
7.1	Design Objectives and Overall Architecture.....	146
7.1.1	Design objectives	146
7.1.2	Overall architecture	147
7.2	Design of the Core Functional Modules	148
7.2.1	Data preprocessing module	148
7.2.2	Drilling–logging data fusion module	149
7.2.3	ROP prediction module	149
7.2.4	Uncertainty analysis and risk evaluation module.....	150
7.2.5	Risk-aware drilling parameter optimization module.....	151
7.3	Dual-Mode Operating Mechanism and Result Organization	152
7.3.1	Dual-mode operating mechanism.....	152
7.3.2	Result organization and output.....	153
7.4	Workflow and Demonstrative Application	153

7.5	Chapter Summary	158
8	Conclusion and Outlook	159
8.1	Conclusions	159
8.2	Major Findings and Limitations	161
8.3	Future Perspectives	164
