LIST OF FIGURES v

LIST OF TABLES vii

CHAPTERS

1. INTRODUCTION 1

2. PRINCIPLES OF ROLLED-UP NANOTECH 3

3. METAMATERIALS MADE OF ROLLED-UP METAL/SEMICONDUCTOR SUPERLATTICES 6

3.1 Electromagnetic fields inside superlattices and effective media 6
3.1.1 Imaging through superlattices with subwavelength resolution 10
3.1.1.1 Influence of finite layer thicknesses on the resolution of a hyperlens 16
3.1.1.2 Influence of absorption on the resolution of a hyperlens 17
3.1.2 The image of a double slit transmitted through a superlattice consisting of GaAs and silver layers 18
3.1.3 Cylindrical hyperlenses 20
3.2 Preparation of cylindrical hyperlenses by rolled-up microrolls 21
3.3 Transmission and reflection measurements on rolled-up microrolls 25
3.3.1 Preparation of nanosized light sources 25
3.3.2 Microscope setup for transmission and reflection analysis on rolled-up superlattices 28
3.3.2.1 Transmission measurements 29
3.3.2.2 Reflectivity measurements 30
3.3.3 Shifted plasma frequencies of metal/semiconductor superlattices 31
3.3.4 Retrieval of optical parameters 37
3.4 Near-field scanning microscopy measurements in cooperation with the University of Bourgogne 41

4. METAMATERIALS MADE OF INAS/METAL MICROROLL ARRAYS 46

4.1 Negative permeabilities for microroll arrays 46
4.2 Preparation of microroll arrays 49

5. SUMMARY AND OUTLOOK **56**
5.1 Summary 56
5.2 Outlook 58

APPENDICES

A. TRANSFER MATRIX FOR METAL/DIELECTRIC SUPERLATTICES AND EFFECTIVE MEDIA **60**
A.1 Transfer matrix for metal/dielectric superlattices 60
A.2 Dispersion in the effective medium approximation 63

B. SAMPLE AND ETCHING PARAMETERS **65**
B.1 Sample parameters 65
B.2 Etching parameters 65
