Contents

1	Introduction	1
1.1	Motivation	1
1.2	Outline	5
1.2.1	Banking intermediation efficiency	5
1.2.2	Banking crises in Switzerland	6
1.2.3	Reduction of macroeconomic volatility in Switzerland	7
1.3	Survey of literature and methodology	7
1.3.1	Banking intermediation efficiency	7
1.3.2	Banking crises	8
1.3.3	Reduction in macroeconomic volatility	10
1.3.4	Stochastic frontier analysis	11
1.3.5	Dynamic factor model	14
1.3.6	Time-varying coefficients Bayesian vector autoregression with sign restrictions	14
1.3.7	Dynamic stochastic general equilibrium model (DSGE)	15
1.4	Results	16
1.4.1	Banking intermediation efficiency	16
1.4.2	Banking crises in Switzerland	16
1.4.3	Reduced macroeconomic volatility	19
1.5	Organization of thesis	19
2	Data Set	21
2.1	Introduction	21
2.2	Sources	22
2.3	Banking groups	23
2.4	Assets	28
2.5	Liabilities	29
2.6	Profit and loss account	30
2.7	Structural breaks	32

3 Risk measures for low frequency data	33
3.1 Introduction	33
3.2 Basel II standardized approach	34
3.3 Limit risk approach	37
3.4 Sharpe ratio	39
3.5 Value at Risk	40
3.6 Financial indicators	42
3.7 Conclusion	46
4 Long run intermediation efficiency	49
4.1 Introduction	49
4.2 Data	51
4.3 Stochastic frontier analysis	52
4.4 Results	59
4.4.1 Profit and Cost Frontiers, 1930-2005	59
4.4.2 Stability	62
4.4.3 Distribution of efficiency scores over time	63
4.4.4 Scale effects and market power	66
4.5 Conclusion	67
5 Bayesian techniques	69
5.1 Bayes rule	69
5.2 Gibbs-sampling	70
5.3 Random walk Metropolis-within-Gibbs-sampler	71
5.4 Kalman filter with simulation based smoothing step	73
6 Identification of banking crises	77
6.1 Introduction	77
6.2 Literature review	80
6.3 Bayesian dynamic stochastic frontier analysis	82
6.4 Bayesian dynamic factor model	90
6.5 Results	96
6.6 Conclusions	98
7 Historical perspective of Swiss banking crises	99
7.1 Introduction	99
7.2 Bank consolidation 1911-1914	102
7.2.1 Post World War I inflation 1919-1920	104
7.2.2 Great Depression 1931-1936	105

7.2.3	Post World War II, 1944-1947	108
7.2.4	1970s	109
7.2.5	Swiss mortgage crisis 1990-1996	113
7.2.6	Dot-Com collapse	115
7.2.7	Sub-Prime crisis	117
7.3	Conclusion	118
8	Macroeconomic effects of Swiss banking crises	121
8.1	Introduction	121
8.2	Banking shock transmission channels	123
8.3	Measurement of macroeconomic effects	125
8.4	Data	126
8.5	Methodology	127
8.6	Results	129
8.7	Conclusions	134
9	Good luck and reduced macroeconomic volatility in Switzerland	137
9.1	Introduction	137
9.2	DSGE model with financial frictions	139
9.2.1	Households	140
9.2.2	Monetary policy	141
9.2.3	Capital producers	141
9.2.4	Entrepreneurs	142
9.2.5	Retailers	143
9.2.6	Solution	144
9.3	Relative mean square approximation error	144
9.4	Results	151
9.5	Conclusion	156
A	Stochastic frontier	1
B	DSGE and RMSAE	9
B.1	RMSAE ratios, single shocks	9
B.2	Technical appendix for the RMSAE measure	14
B.2.1	Covariance-generating function	14
B.2.2	The trace	16
B.2.3	Positive semidefinite matrices	16
B.2.4	Diagonalization of symmetric matrices	17
B.2.5	Singular value decomposition	19

B.3	Variables of the DSGE model	19
B.4	Parameterization of the DSGE model	24
B.5	First order conditions	24
B.5.1	Households	24
B.5.2	Monetary policy	26
B.5.3	Capital producers	27
B.5.4	Entrepreneurs	27
B.5.5	Retailers	29
B.5.6	Law of motion	32
B.5.7	Shocks	32
B.6	Steady state	34
B.7	Log-linearization	35
B.8	Impulse responses	35
