

## I. Table of Contents

	Page
<b>1. Introduction</b> .....	<b>1</b>
<b>1.1 Basic principles of genetic modification within agriculture</b> .....	<b>1</b>
1.1.1 Production of genetically modified crops.....	1
1.1.2 Commercial use of genetically modified feed.....	2
<b>1.2 Insect resistant <i>Bacillus thuringiensis</i>-maize</b> .....	<b>3</b>
1.2.1 <i>Bacillus thuringiensis</i> : Ecology and taxonomy .....	4
1.2.2 Mode of action of <i>Bacillus thuringiensis</i> Cry proteins.....	5
1.2.3 Fusarium infestation and mycotoxin contamination in cultivation of maize .....	5
<b>1.3 Studies with feeds containing <i>Bacillus thuringiensis</i>-maize</b> .....	<b>7</b>
 <b>2. Manuscript 1</b> (published in: Poultry Science 2009; 88(6):1186-1190) Serum chemistry reference values in adult Japanese quail ( <i>Coturnix coturnix japonica</i> ) including sex-related differences.....	     <b>10</b>
 <b>3. Manuscript 2</b> (to be submitted to: Food and Chemical Toxicology) Blood chemistry and histological investigations in Japanese quail ( <i>Coturnix coturnix japonica</i> ) fed diets containing genetically modified maize: a multigenerational comparison .....	     <b>24</b>
 <b>4. Manuscript 3</b> (submitted to: Poultry Science 2010) Effects of an active immunization on the immune response of laying Japanese quail ( <i>Coturnix coturnix japonica</i> ) fed with or without genetically modified <i>Bacillus thuringiensis</i> -maize .....	     <b>45</b>
 <b>5. Conclusions</b> .....	 <b>63</b>
 <b>6. Summary</b> .....	 <b>65</b>

II

7. Zusammenfassung .....	69
8. References .....	73
