ABSTRACT ..... **vi**
LIST OF FIGURES ..... **viii**
LIST OF TABLES ..... **ix**

1 Introduction: Agricultural reforms and problems in Kyrgyzstan; Motivation of the study **1**
1.1 Agricultural reforms in Kyrgyzstan 1
1.1.1 Problems of the independent farmers in post reform era 8
1.1.2 Rural poverty and households 10
1.2 Market and coordination failures, poverty traps and state intervention 12
1.2.1 Institutions and underdevelopment 18
1.2.2 State and interventions 21
1.3 Motivation and the objectives of the study 25

2 Theoretical aspects of the village wide and agricultural household models; Non separability of households, as related to the village CGE model **30**
2.1 Village level analysis as appropriate framework 30
2.2 Theoretical structure of the village model 35
2.3 Concept of agricultural household model and implication of non separability 41
2.4 Specific structure of the village model 51
2.4.1 Production 51
2.4.2 Consumption 58

3 Description and spatial aspects of the subject village; Empirical analysis of the rural household data **62**
3.1 Case village "Sarytalaa" and the spatial context 62
3.2 Empirical test of (non) separability of rural households in the subject village 70
3.2.1 Non separability and imperfect labor market 71
3.2.2 The data used for non separability test 73
3.3.3 Results of testing (non) separability of village households 75

4 Shadow Prices and Village SAM construction **79**
4.1 Estimating household specific, shadow prices for household non tradables 79
4.1.1 Empirical approach to shadow price estimation 80
4.1.2 Data and results of shadow price estimation 83
4.2 Village SAM 86
4.2.1 Input – output structure of the applied village SAM 89
4.2.2 Income and expenditures of the village households 93
Summary remarks 96

5 Development policy experiments in the village context and model results..... 97
5.1 Policies to affect the transaction/marketing cost of marketed supply..... 99
Experiment 1: 10% decrease in marketing /transaction cost of all village export.. 106
5.2 Policies that entail the productivity enhancing technological change 110
Experiment 2: 10 % technological improvement in crop production 113
5.3 Policies that reduce the price of external inputs (e.g. input subsidies)..... 118
Experiment 3: 10% cost reduction of the external inputs for crops..... 120
5.4 Policies to make the credit funds and investment available to rural farmers.. 123
Experiment 4: 10% increase in capital stock that result from credit reforms..... 125
5.5 Policies/ outcomes that affect the village labor market 128
Experiment 5: Expanding the share of the in village labor market..... 129
Experiment 6: Expanding the share of the off village labor market 131

6 The study: summary, conclusions, limitations and future directions 135
