

## II TABLE OF CONTENTS<sup>1</sup>

I	ACKNOWLEDGEMENTS .....	V
II	TABLE OF CONTENTS .....	VII
III	ABBREVIATIONS .....	XI
IV	INDEX OF TABLES, FIGURES, SUPPLEMENTAL MATERIAL .....	XV
<b>1</b>	<b>Introduction .....</b>	<b>1</b>
1.1	Preamble .....	1
1.2	Scope and outline of the thesis.....	3
<b>2</b>	<b>Background.....</b>	<b>5</b>
2.1	Child health .....	5
2.2	Developmental origins of health and disease.....	7
2.2.1	Historical perspective on ‘developmental origins of health and disease’ research.....	7
2.2.2	Intrauterine programming .....	8
2.3	Fetal development.....	9
2.4	Maternal-fetal psychobiological programming model.....	12
2.4.1	Exposures .....	14
2.4.1.1	Maternal stress during pregnancy.....	15
2.4.1.2	Use of synthetic glucocorticoids during pregnancy .....	18
2.4.2	Biological mechanisms of intrauterine programming.....	21
2.4.2.1	Changes at the placental level .....	21
2.4.2.2	Alterations in offspring physiology.....	21
2.4.2.3	Epigenetic modifications .....	22
2.5	Objectives .....	24
<b>3</b>	<b>Maternal psychosocial stress during pregnancy and the placenta: Evidence from a population-based cohort study .....</b>	<b>27</b>
3.1	Abstract .....	27
3.2	Introduction .....	29
3.3	Methods.....	30
3.3.1	Study cohort .....	30
3.3.2	Exposures .....	30
3.3.3	Outcome measures .....	31
3.3.4	Statistical analyses .....	31
3.4	Results.....	33
3.4.1	Study cohort descriptives .....	33
3.4.2	Multiple Regression Analyses.....	35
3.5	Discussion .....	36

<sup>1</sup> For the sake of clarity, the Table of Contents basically includes three levels of headings, even though some of the chapters include fourth and fifth levels of headings with minor importance. Only if necessary for orientation, the fourth level of heading is included.

<b>4</b>	<b>Fetal growth adjusts to type of prenatal stress: Evidence from a population-based cohort study .....</b>	<b>41</b>
4.1	Abstract .....	41
4.2	Introduction .....	43
4.3	Methods.....	44
4.3.1	Study cohort .....	44
4.3.2	Exposures .....	45
4.3.3	Outcome measures .....	45
4.3.4	Statistical analyses .....	45
4.4	Results.....	48
4.4.1	Study cohort descriptives .....	48
4.4.2	Multiple Regression Analyses.....	50
4.5	Discussion .....	52
4.5.1	Comparison with previous studies .....	52
4.5.2	Putative mechanisms.....	54
4.5.3	Potential long-term implications .....	55
4.5.4	Strengths and limitations.....	57
4.5.5	Future studies .....	58
4.5.6	Conclusion.....	58
<b>5</b>	<b>Prenatal stress and pediatric diseases: A population-based cohort study .....</b>	<b>59</b>
5.1	Abstract .....	59
5.2	Introduction .....	61
5.3	Methods.....	61
5.3.1	Study cohort .....	61
5.3.2	Exposures .....	62
5.3.3	Outcome measures .....	62
5.3.4	Statistical analyses .....	63
5.4	Results.....	65
5.4.1	Study cohort descriptives .....	65
5.4.2	Cox proportional hazards models and logistic regression analyses .....	69
5.5	Discussion .....	73
5.6	Supplemental Material	
<b>6</b>	<b>Asthma treatment with glucocorticoid inhalants during pregnancy and pediatric diseases in the offspring: A population-based cohort study .....</b>	<b>83</b>
6.1	Abstract .....	83
6.2	Introduction.....	85
6.3	Methods.....	86
6.3.1	Study cohort .....	86
6.3.2	Exposures .....	86
6.3.3	Outcome measures .....	86
6.3.4	Statistical analyses .....	87
6.4	Results.....	88
6.4.1	Study cohort descriptives .....	89
6.4.2	Cox proportional hazards models and logistic regression analyses .....	91
6.5	Discussion .....	93
6.6	Supplemental Material	

<b>7</b>	<b>Intrauterine exposure to synthetic glucocorticoids and fetal, newborn, and infant hypothalamic-pituitary-adrenal function in humans: A systematic review .....</b>	<b>103</b>
7.1	Abstract .....	103
7.2	Introduction .....	105
7.2.1	Background .....	105
7.2.2	Rationale for this review .....	106
7.2.3	Objectives .....	106
7.3	Pharmacological and physiological background .....	107
7.3.1	Clinical treatment with synthetic glucocorticoids during pregnancy and its historical perspective ..	107
7.3.2	Fetal drug exposure .....	108
7.3.3	Ontogeny of glucocorticoid receptors .....	114
7.3.4	Development of hpa axis .....	115
7.4	Methods of the systematic review .....	119
7.4.1	Criteria for including studies in this review .....	120
7.4.2	Search strategy for identification of studies .....	121
7.4.3	Methods of the review and study characteristics .....	121
7.5	Results .....	125
7.5.1	Association between intrauterine exposure to synthetic glucocorticoids and basal hpa function .....	125
7.5.2	Association between intrauterine exposure to synthetic glucocorticoids and hpa reactivity .....	132
7.5.3	Glucocorticoid dose and hpa function .....	140
7.5.4	Time between glucocorticoid treatment and assessment of hpa function .....	141
7.5.5	Summary of the sensitivity analyses .....	144
7.6	Discussion .....	144
7.6.1	Summary of the main results of the studies .....	144
7.6.2	Overall study limitations and alternative explanations for observed results .....	145
7.6.3	Mechanisms of hpa axis suppression .....	149
7.6.4	Model of altered hpa axis function after antenatal exposure to synthetic glucocorticoids .....	154
7.6.5	Clinical implications: Adverse health consequences of functional hypocortisolism during infancy ..	154
7.6.6	Hpa axis dysregulation as a mechanism linking intrauterine environment to compromised health ..	158
7.6.7	Relevance of the findings for understanding effects of psychosocial stress during pregnancy .....	159
7.6.8	Future studies .....	160
7.7	Summary and conclusions .....	161
7.8	Supplemental Material	
<b>8</b>	<b>Overall discussion, appraisal, outlook.....</b>	<b>181</b>
8.0	Preliminary note .....	181
8.1	Summary of the main findings and conclusions .....	181
8.2	Elaboration of the maternal-fetal psychobiological programming model .....	183
8.2.1	Integrating the presented work into the maternal-fetal psychobiological programming model .....	185
8.2.2	Further elaboration of the maternal-fetal programming model.....	195
8.3	Critical appraisal .....	199
8.4	Outlook .....	201
8.4.1	Research implications .....	202
8.4.2	Clinical implications .....	206
8.4.3	Policy implications .....	209
8.5	Conclusion .....	211

## II Table of Contents
