
TABLE OF CONTENTS

1	General Introduction: The Use of Grain Legumes as a Protein Source in Pig Nutrition	3
1.1	Summary	3
1.2	Introduction.....	3
1.3	Grain Legumes.....	5
1.3.1	Faba Beans (<i>Vicia Faba</i>).....	6
1.3.2	Peas (<i>Pisum Sativum</i>).....	7
1.3.3	Lupins (<i>Lupinus Albus</i> , <i>Lupinus Angustifolius</i> , <i>Lupinus Luteus</i>).....	7
1.4	Nutritional Composition	8
1.4.1	Crude Protein and Amino Acids	8
1.4.2	Crude Fat and Lipids	9
1.4.3	Carbohydrates	10
1.5	Secondary Plant Metabolites.....	13
1.5.1	Tannins.....	14
1.5.2	Protease Inhibitors	15
1.5.3	Alkaloids	17
1.5.4	Lectins	18
1.5.5	Pyrimidine Glycosides	19
1.5.6	Saponins	20
1.6	Feeding Value	21
1.6.1	Energy and Amino Acid Digestibility.....	21
1.6.2	Processing of Grain Legumes	26
1.7	Conclusions.....	29
1.8	Scope and Objective of the Thesis.....	30
1.9	References	31
2	Chemical Composition and Standardised Ileal Digestibilities of Crude Protein and Amino Acids in Grain Legumes for Growing Pigs	45
2.1	Summary.....	45
2.2	Introduction.....	45
2.3	Materials and Methods.....	46
2.3.1	Animals, Housing and Surgical Procedures	46
2.3.2	Experimental Design and Dietary Treatments to Determine SID of CP and AA in Grain Legumes	47
2.3.3	Experimental Design and Dietary Treatments to Estimate Basal Ileal Endogenous Losses and SID of CP and AA in Casein	48
2.3.4	Experimental Procedure	51
2.3.5	Analytical Procedure	52
2.3.6	Calculations	52
2.3.7	Statistical Analyses	54
2.4	Results and Discussion	55
2.4.1	Chemical Composition of the Assay Feed Ingredients.....	55
2.4.2	Basal Ileal Endogenous Losses and SID of CP and AA in Casein.....	62

2.4.3	Standardised Ileal Digestibility of CP and AA in Grain Legumes	65
2.5	Conclusions.....	76
2.6	Acknowledgements	77
2.7	References	78
3	<i>In Vitro</i> Prediction of Standardised Ileal Crude Protein and Amino Acid Digestibilities in Grain Legumes for Growing Pigs	85
3.1	Summary.....	85
3.2	Implications	85
3.3	Introduction.....	85
3.4	Materials and Methods	87
3.4.1	Grain Legume Samples.....	87
3.4.2	<i>In Vitro</i> Digestion Method	88
3.4.3	Statistical Analyses	91
3.4.4	Results and Discussion	91
3.5	Acknowledgements	104
3.6	References	105
4	General Discussion	111
4.1	Introduction.....	111
4.2	Grain Legumes in Pig Nutrition	111
4.3	Grain Legumes in Poultry Nutrition	113
4.4	Grain Legumes in Ruminant Nutrition	115
4.5	Beneficial Effects of Secondary Plant Metabolites from Grain Legumes	116
4.5.1	Pharmacological Effects.....	117
4.5.2	Microbiological Effects.....	117
4.6	Conclusions.....	118
4.7	References.....	119
5	Summary.....	127
6	Zusammenfassung.....	133

LIST OF TABLES

Table 1.	The crude protein and amino acid contents of grain legumes compared to soybean meal (g/kg DM) ^a	8
Table 2.	Distribution of protein fractions in grain legumes compared to soybean meal (g/kg CP) ^a	9
Table 3.	Carbohydrate contents of grain legumes compared to soybean meal (g/kg DM) ^a	13
Table 4.	Contents of secondary plant metabolites in different cultivars of faba beans, peas and lupins compared to soybean meal (g/kg DM) ^a	14
Table 5.	Ether extract and carbohydrate content (g/kg DM) and energy content (MJ/kg DM) in grain legumes compared to soybean meal and cereals ^a	23
Table 6.	Coefficients of standardised ileal digestibilities of crude protein and amino acids in grain legumes compared to soybean meal ^a	25
Table 7.	Composition of the assay diets ¹ for determination of standardised ileal digestibilities of crude protein and amino acids in grain legumes (g kg ⁻¹ as-fed).....	50
Table 8.	Composition of the assay diets for determination of basal ileal endogenous losses and standardised ileal digestibilities of crude protein and amino acids in casein (g kg ⁻¹ as-fed).....	51
Table 9.	The analysed chemical composition of assay feed ingredients (g kg ⁻¹ DM).....	58
Table 10.	The analysed contents of indispensable amino acids in the assay feed ingredients (g kg ⁻¹ DM).....	59
Table 11.	The analysed contents of dispensable amino acids in the assay feed ingredients (g kg ⁻¹ DM).....	60
Table 12.	The analysed contents of antinutritional factors in the assay feed ingredients (g kg ⁻¹ DM).....	61
Table 13.	The analysed chemical composition of the assay diets for determination of basal ileal endogenous losses and standardised ileal digestibilities of crude protein and amino acids in casein (g kg ⁻¹ DM).....	63
Table 14.	The contents (g kg ⁻¹ DMI) of apparent ileal digestible crude protein and amino acids in the assay diets for the determination of basal ileal endogenous losses and standardised ileal digestibilities of crude protein and amino acids in casein.....	64
Table 15.	The estimates of the linear regression between dietary contents of apparent ileal digestible and total crude protein and amino acids.....	65
Table 16.	The analysed chemical composition of the assay diets for determination of standardised ileal digestibilities of crude protein amino acids in grain legumes (g kg ⁻¹ DM) ¹	66
Table 17.	Average standardised ileal digestibilities (%) of crude protein and amino acids in faba beans, peas, lupins and soybean meal ¹	68
Table 18.	Standardised ileal digestibility (%) of crude protein and amino acids in faba bean cultivars and soybean meal.....	71
Table 19.	Standardised ileal digestibility (%) of crude protein and amino acids in pea cultivars and soybean meal.....	73
Table 20.	Standardised ileal digestibility (%) of crude protein and amino acids in lupin cultivars and soybean meal.....	75

Table 21.	The estimates of the linear regression analysis between standardised ileal digestibilities of crude protein and amino acids in the faba bean containing assay diets and dietary contents of condensed tannins	76
Table 22.	The analysed nutrient composition and contents of antinutritional factors in the assay feed ingredients (g/kg DM).....	93
Table 23.	The analysed contents of amino acids in the assay feed ingredients (g/kg DM).....	94
Table 24.	<i>In vitro</i> enzyme digested nitrogen (DN, g/kg DM) and <i>in vitro</i> enzyme undigested dry matter (UDM, g/kg DM) in grain legumes	96
Table 25.	<i>In vivo</i> standardised ileal digestibilities of crude protein and amino acids in grain legumes (%) ¹	97
Table 26.	<i>In vitro</i> predicted standardised ileal digestibilities of crude protein and amino acids in grain legumes (%)	98
Table 27.	The estimates of the linear regression analysis between <i>in vitro</i> predicted standardised ileal digestibilities of crude protein and amino acids and contents of condensed tannins in faba beans.....	99
Table 28.	Differences ¹ between <i>in vitro</i> predicted and <i>in vivo</i> standardised ileal digestibilities of crude protein and amino acids in grain legumes (percentage units).....	101
Table 29.	The estimates of the multiple linear regression analyses between <i>in vivo</i> standardised ileal digestibilities of crude protein and amino acids and <i>in vitro</i> predicted standardised ileal digestibilities of crude protein and amino acids in grain legumes	103
