## CONTENTS

|          |                                                                |           |
|----------|----------------------------------------------------------------|-----------|
| <b>1</b> | <b>INTRODUCTION.....</b>                                       | <b>1</b>  |
| 1.1      | <i>Medicago truncatula</i> – A model for legume research ..... | 1         |
| 1.2      | Symbiotic N <sub>2</sub> fixation .....                        | 4         |
| 1.3      | Nodule metabolism .....                                        | 6         |
| 1.3.1    | Nodule carbon metabolism .....                                 | 6         |
| 1.3.2    | Nodule nitrogen metabolism .....                               | 8         |
| 1.3.3    | Nodule oxygen metabolism .....                                 | 11        |
| 1.4      | Regulation of symbiotic N <sub>2</sub> fixation .....          | 14        |
| 1.4.1    | Is the regulation under the host plant control?.....           | 15        |
| 1.4.2    | Master control: N-feedback regulation .....                    | 16        |
| 1.4.3    | Sensing and signaling N-status in plants .....                 | 17        |
| 1.4.4    | How is N <sub>2</sub> fixation adjusted to N-demand? .....     | 18        |
| 1.4.4.1  | Nodulation.....                                                | 19        |
| 1.4.4.2  | Symbiosome transport .....                                     | 20        |
| 1.4.4.3  | Oxygen supply .....                                            | 20        |
| 1.4.4.4  | Carbon metabolism .....                                        | 21        |
| <b>2</b> | <b>AIMS AND HYPOTHESES .....</b>                               | <b>24</b> |
| <b>3</b> | <b>METHODOLOGY .....</b>                                       | <b>24</b> |
| <b>4</b> | <b>FINDINGS.....</b>                                           | <b>28</b> |
| <b>5</b> | <b>DISCUSSION AND SPECULATIONS .....</b>                       | <b>32</b> |
| <b>6</b> | <b>REFERENCES.....</b>                                         | <b>36</b> |
