

# Table of Contents

1	Background	1
1.1	Introduction	1
1.2	Research questions	10
1.3	An introduction from a historical perspective	11
1.3.1	Independence after 1820 – Export diversification and the extension of coffee cultivation	15
1.3.2	The agrarian question during the twentieth century - Initial projects of Agrarian Reform	23
1.3.3	The bimodal agricultural sector	28
1.3.4	The agrarian reform of 1980	33
1.3.5	Constraints towards the end of the armed conflict and the beginning of the Land Transfer Program (LTP)	36
1.4	The peace agreement of 1992 and its impact on the agrarian reform	43
1.4.1	Bargaining over the terms of peace and land - Use of land policy towards the maintenance of peace	46
1.4.2	The peace accords	47
1.4.3	The agrarian chapter of the peace agreements	51
1.4.4	Outcomes of the Land Transfer Program (LTP)	57
1.4.5	Agrarian debt and the call for debt default	61
2	Theoretical Framework	65
2.1	Institutions and economic development	67
2.1.1	The concept of institutions and transaction costs in a land tenure context	67
2.1.2	Institutions and transaction costs	68
2.1.3	The function and role of institutions in development	72
2.2	Getting property rights “right” to enhance development	75
2.2.1	On the conceptualization of property rights	75
2.2.2	The development of property rights	77
2.2.2.1	Market forces in the emergence of property rights	82
2.2.2.2	Rent seeking theory of the State and changes in property rights	85

2.2.2.3	Imperfect information and the emergence of property rights	88
2.2.3	Efficiency aspects of property rights. The search for the right efficiency aspect to use	90
2.2.3.1	Pareto efficiency, property rights and social welfare	92
2.2.3.2	Comparative institutional approaches	95
2.2.3.3	Liberal approach of Austrian Contractarianism on assessing the concept of “efficient” allocation of property rights	97
2.2.3.4	Political markets and the search for efficient property rights	100
2.2.4	Land tenure and property rights regimes	105
2.2.4.1	Owner cultivation of small private lands	112
2.2.4.2	Large estates or latifundia	113
2.2.4.3	(Smallholder) leasing from private landowners	114
2.2.4.4	Squatting on public or private lands	115
2.2.4.5	Communal tenure – communal ownership	116
2.2.4.6	State ownership	117
2.2.5	Land tenure and economic development	119
2.2.5.1	Property rights reforms	122
2.2.5.2	The tenure security effect of enhanced property rights on land	125
2.2.5.3	Transfer Rights Effects and the importance of use of land as collateral	127
2.2.5.4	Effect of ex-ante levels of wealth in credit markets	129
2.2.5.5	Wealth, Risk and Credit Rationing	133
2.3	Inequality, distribution and economic performance	141
2.3.1	How have growth and distribution been related?	141
2.3.2	The effect of growth on distribution - The classical approach based on Kuznets curves	144
2.3.3	The effect of distribution on growth	147
2.3.3.1	Political economy aspects of inequality and growth	150
2.3.3.2	Opportunity enhancing effects of redistribution – the case of imperfect credit markets	152
2.3.3.3	Market failure in the contractibility of effort	155

2.3.3.4	Positive socioeconomic effects of redistribution	159
2.3.3.4.1	Social conflict channels	159
2.3.3.4.2	Macroeconomic stability effect	160
3	Research methodology	162
3.1	Research hypothesis	162
3.2	Sampling and data collection	164
3.2.1	Group and expert discussions	166
3.2.2	Census survey	167
3.2.3	Household survey	167
3.2.4	Some insights into descriptive statistics of the area	169
4	The case study: empirical analysis	175
4.1	Introduction	175
4.2	Effects of property rights reform on credit and investment	177
4.2.1	Research methodology for the effects of property rights reforms on enhanced credit and investment	177
4.2.1.1	The enhanced access to credit	178
4.2.1.2	Specification and testing of the econometric model	181
4.2.2	Variables included in the econometrical analysis	187
4.2.3	Results on credit supply	190
4.2.3.1	Econometric model used for analyzing the impact of changed access to credit	193
4.2.3.2	Results of the regression analysis on credit access	195
4.2.4	Econometric analysis on investment	204
4.2.4.1	Econometric model for the estimation of determinants of investment on land with endogenous explanatory variables	207
4.2.4.2	Results of the regression analysis on investments	209
4.2.5	Conclusions on credit accessibility of the land-poor and determinants of investment	215
4.3	Efficiency and socioeconomic implications of an emerging land market in the research area.	226

4.3.1	Theoretical assumptions on the functioning of land markets	228
4.3.2	Participation in the land market of different social groups	233
4.3.3	Econometric model on the probability of entering the land market as a buyer	244
4.3.4	Summary and conclusions on the developments of the land market	247
5	Summary and perspectives	249
6	Reference List	261
7	Appendixes	288
7.1	Community “Flor de Fuego” – a case study of poorly defined property rights on land	288
7.2	Community Santa Monica	291
7.3	Community Santa Marta	295
7.4	Communities La Pita, Puerto Nuevo and Montecristo - Distribution of land reserved for natural conservation.	300
