Contents

1	Introduction	1
2	Radio Channel Model	5
2.1	Introduction	5
2.2	Path Loss	6
2.2.1	Single-slope path loss model	7
2.2.2	Dual-slope path loss model	7
2.3	Shadowing	8
2.4	Multi-Path Propagation	10
2.4.1	Multiple reflectors	12
2.5	Statistical channel model	12
2.5.1	Broad-band and Narrow-band radio channel	13
2.5.2	Narrow-band statistical models	15
2.5.3	Time-invariant WSSUS model	16
3	OFDM Transmission Technique	17
3.1	OFDM System Model	17
3.1.1	Transmission Signal	19
3.2	Channel Capacity	22
3.2.1	Bandwidth Efficiency	23
3.2.2	OFDM Capacity	24
3.3	Modulation	24
3.3.1	Fixed Modulation	25
3.3.2	Channel Coding	26
3.3.3	Adaptive Modulation	28
3.4	Simulation Parameters	32
4	Multi-Antenna Radio Channel Models	35
4.1	Introduction	35
4.2	MIMO Channel Representation	36
4.3	I.i.d. Gaussian Radio Channel Model	38

4.3.1	Correlation	39
4.3.2	Singular Value Decomposition	40
4.4	MIMO-WSSUS Radio Channel Model	41
4.4.1	Scatterers	43
4.4.2	Antenna Array geometries	43
4.4.3	Random Angles vs. Fourier Angles	45
4.4.4	Wide-band MIMO channel impulse response	47
4.4.5	Correlation	49
4.4.6	Singular Values	54
4.5	Other MIMO Channel Models	59
4.6	Channel Normalization	60
4.7	Conclusion	61
5	MIMO Techniques	63
5.1	MIMO-OFDM Structure	63
6	Diversity	69
6.1	Receive Diversity	69
6.1.1	Selection diversity	70
6.1.2	Maximum Ratio Combining	76
6.1.3	Equal Gain Combining	79
6.2	Transmit Diversity	84
6.2.1	Space-Time Block Codes: Alamouti Scheme	84
7	Spatial Multiplexing	89
7.1	Multiplexing with transmitter channel knowledge	90
7.1.1	Transformed MIMO transmission	90
7.1.2	Performance	94
7.2	Multiplexing without transmitter channel knowledge: Linear MIMO Receivers	96
7.2.1	Zero Forcing / Matrix Inversion	97
7.2.2	Optimum MMSE Receiver	100
7.2.3	Linear Receivers in MIMO-WSSUS radio channel	104
7.3	Spatial Multiplexing with variable Channel Knowledge at the Transmitter	109
7.3.1	Variable Channel Knowledge through Matrix Parameterization	110
7.3.2	Parameterization of Unitary Matrices	111
7.3.3	Matrix Factorization Algorithm	113

7.3.4	Approximation Error	116
7.3.5	Performance	117
7.4	Conclusion	122
8	System Performance and Radio Channel Models	125
8.1	Gaussian I.I.D. Radio Channel Model	125
8.2	MIMO-WSSUS Radio Channel Model	126
8.3	Maximum Entropy Radio Channel Model	127
8.4	Wide-band Double-directional Radio Channel Model (WDDCM)	130
9	Conclusion	133
A	Derivations	137
A.1	PDF of random phases	137
A.1.1	PDF of $Y = \sin U$	137
A.1.2	PDF of $\Re\{\exp(j\pi \sin U)\}$	137
A.1.3	PDF of $\Im\{\exp(j\pi \sin U)\}$	139
A.1.4	Mean value of $\Re\{\exp(j\pi \sin U)\}$	140
B	Simthetic: A Programming Framework for OFDM and MIMO Simulations	143
B.1	Introduction	143
B.2	Software	144
B.2.1	Simulation Structure	144
B.2.2	Graphical user interface KSimthetic	146
B.3	OFDM	147
B.4	Getting Started with Programming	148
B.5	Conclusion	150
