Inhaltsverzeichnis

Mikrooptik für photonische Verbindungstechnik 6

40 GHz bis 100 GHz Bonding und Packaging 36

Solderjet bumping for the assembly of optical fibers 42

From the idea to the prototype, a Demultiplexer for WDM over POF 47

Access Networks for 10 Gbit/s everywhere 60

Modulare Systemkomponenten auf Basis planar-optischer Polymer-Chips 73

Modul-Bauformen und Bauformen von ROSA und TOSA 83

Optical coupling using planar thin glass based waveguide components 101

Optical link for high-speed board-level parallel interconnections 105

Multi channel coupling elements for optical printed circuit boards and optical backplanes 110

Pluggable Connector Technologies for Polymeric Electro-Optical Backplanes 119
