

Contents

1. Introduction	1
1.1. Organic Light Emitting Diodes	1
1.2. OLED Displays	2
1.3. Aims and Outline	4
2. Physical Fundamentals	6
2.1. Molecules with Conjugated π -Systems	6
2.1.1. Photophysical Processes	7
2.1.2. Electronic Energy Transfer	8
2.2. Organic Semiconductor	10
2.2.1. Contact Barrier	10
2.2.2. Charge Transport	12
2.2.3. Doping Approach	14
2.3. Organic Devices	16
2.3.1. Quantum Efficiency	16
2.3.2. Light Extraction	18
2.3.3. Device Structure	19
3. Fabrication and Characterization	21
3.1. Technology	21
3.1.1. Organic Molecular Beam Deposition	21
3.1.2. Sputter Deposition	22
3.1.3. Pulsed Laser Deposition	24
3.1.4. Atomic Layer Deposition	25
3.2. Device Preparation	28
3.3. Analytical Methods	29
3.3.1. Electro-Optical Characterization	29
3.3.2. Kelvin Probe Technique	30

4. Transparent Active Matrix OLED Pixel	32
4.1. ITO Sputtering onto Organic Layers	32
4.1.1. ITO Sputtering Process	33
4.1.2. Sputter Damaging Effects	34
4.1.3. Buffer Layer	37
4.2. Stacking by Charge Generation Layer	40
4.3. Transparent TFT	44
4.4. Vertical Integration	45
4.5. Conclusion	47
5. Novel Sputtering Buffer Layers	49
5.1. WO ₃ Hole Injection Layer	49
5.2. WO ₃ Buffer Layer	56
5.2.1. Structural Properties	60
5.2.2. Electrochromism	62
5.2.3. Stability in Terms of Sputtering Power	63
5.3. MoO ₃ Buffer Layer	65
5.4. Indium-free OLEDs employing AZO Electrodes	67
5.5. Conclusion	71
6. Advanced Device Concepts	73
6.1. P-Type Doping with WO ₃	73
6.2. Application of p-Doping to OLED Devices	77
6.3. Light Extraction	80
6.4. Conclusion	83
7. Thin Film Encapsulation	85
7.1. Atomic Layer Deposition	85
7.2. ALD Barrier Thin Films	86
7.3. Permeation Rate Determination	89
7.4. Al ₂ O ₃ /ZrO ₂ nanolaminate	90
7.5. Conclusion	95
8. Conclusion and Outlook	97
A. Molecular Structures	102
Bibliography	104
