

CONTENTS

PREFACE	1
PART ONE: Basics and basic findings	7
1 Semantic memory	7
1.1 Behavioral evidence for a distinction between natural and artifactual categories	8
1.1.1 The basic distinction	8
1.1.2 Sex differences	9
1.2 Evidence from brain-damaged patients	10
1.3 Evidence from cognitive neuroscience	10
1.4 Theories on category-specific effects	12
1.4.1 Familiarity	13
1.4.2 Domain-specific or category-specific theories	13
1.4.3 Sensory-functional or modality-specific theories	14
1.4.4 Correlated features theories	14
1.4.5 Evaluative summary	15
2 Semantic priming	18
2.1 Paradigm	18
2.2 Theories on semantic priming mechanisms	19
2.2.1 Expectancy based theories	19
2.2.2 Spreading activation models	20
2.2.3 Distributed network models	21
2.2.4 Compound-cue models	22
2.2.5 Other models	22
2.2.6 Evaluative summary	23
2.3 Semantic priming and the natural/artifactual distinction	24
3 Semantic priming for natural and artifactual categories in consideration of participants' sex	27
3.1 Experiment 1a: The basic finding	27
3.2 Experiment 1b: Replication	33
3.3 Summary and conjoint discussion of Experiment 1a and 1b	35
PART TWO: Methodical variations	39
4 Differences in cerebral hemisphere involvement	39
4.1 Hemisphere differences	39
4.1.1 Behavioral evidence regarding semantic processing: Divided visual field technique	40
4.1.2 Further evidence for hemisphere differences regarding semantic processing	44
4.1.3 Evidence for sex differences regarding the cerebral hemispheres	44
4.1.4 Evidence for hemisphere differences regarding different categories/ category types	46
4.2 Experiment 2: Lateralized presentation	49

5 Neurophysiological basis	63
5.1 Event-related potentials	63
5.1.1 The N400 (and semantic priming)	64
5.1.2 Some further ERP components related to semantic priming	71
5.1.3 ERP components of a superordinate-subordinate relationship of prime and target	72
5.1.4 Sex differences	74
5.2 Experiment 3: Event-related potentials	75
 PART THREE: Modulation by focus	 86
6 Default processing modes	86
6.1 Altering effects	88
6.2 Experiment 4: Focus 1	89
6.3 Experiment 5: Focus 2	97
6.4 Conjoint discussion of Experiment 4 and 5	103
 PART FOUR: General discussion	 110
