1 INTRODUCTION	1
2 LITERATURE REVIEW	3
2.1 Pastoral production systems	3
2.1.1 Pastoralists	3
2.1.2 Production constraints	4
2.2 Local knowledge	5
2.2.1 Pastoralists local knowledge	7
2.2.2 Studying local knowledge	9
2.3 Small ruminant genetic resources	13
2.3.1 Local livestock breeds	13
2.3.2 Small ruminant genetic resources in Sub-Saharan Africa	14
2.3.3 Functions of small ruminants in pastoral systems	15
2.4 Characterisation of animal genetic resources	16
2.4.1 Characterizing of local livestock resources in pastoral production systems	18
2.4.2 Characteristics of small ruminant genetic resources in pastoral production systems	19
3 MATERIALS AND METHODS	27
3.1 Study area	27
3.1.1 Geographical location	27
3.1.2 Bio-climatic condition	28
3.1.3 Livestock	29
3.1.4 Human population, ethnicity and settlement	30
3.1.5 Infrastructure and extension services	31
3.2 Study design	32
3.2.1 Theoretical model (Cybernetic loop)	32
3.2.2 Assessment of age and sex classes, functions, relevant traits and types in sheep and goats	32
3.2.3 Identification of management practices of sheep and goats	36
3.2.4 Assessment of the performance of the local goat population studies	36
3.2.5 Data management and analysis	44

4	RESULTS	49
4.1	Age and sex classes in sheep and goats	49
4.1.1	Lambs and kids	49
4.1.2	Yearlings and adults	49
4.2	Functions of sheep and goats by age and sex classes	50
4.2.1	Production functions	52
4.2.2	Maintenance and reproduction functions of sheep and goats in the flock	56
4.3	Management of Gabra and Rendille sheep and goats genetic resources	57
4.3.1	Maintenance management of lambs and kids	57
4.3.2	Maintenance management of yearling and adult sheep and goats	59
4.3.3	Reproduction management	60
4.3.4	Lactation management	61
4.4	Relevant traits in sheep and goats and the traits preferred levels	62
4.4.1	Relevant traits and their preferred levels in sheep by age and sex classes	62
4.4.2	Relevant traits and their preferred levels in goats by age and sex classes	66
4.4.3	Summary of the most relevant traits	70
4.5	Types in sheep and goats	71
4.5.1	Gabra sheep types	71
4.5.2	Gabra and Rendille goat types	72
4.6	Performance of goats	74
4.6.1	Body condition of does	75
4.6.2	Reproduction performance	78
4.6.3	Milk yield and seasonality of kidding	86
4.6.4	Summary of the performance of Gabra and Rendille goats	90
5	DISCUSSION	91
5.1	Characterisation and management of sheep and goats by Gabra and Rendille pastoralists	91
5.1.1	Age and sex classes	91
5.1.2	Functions of sheep and goats	92
5.1.3	Relevant traits	94
5.1.4	Sheep and goat types	97
5.2	Performance of goat genetic resources under pastoral management of Gabra and Rendille pastoralists	98
5.2.1	Body condition score	98
5.2.2	Reproduction performance	99
5.2.3	Milk yield	103
5.2.4	Differences between characterisation of livestock resources in their production system context and parameter-based characterisation	104
5.3	Productive adaptability and drought tolerance in the small ruminants	105
5.4	Methodology for characterisation of animal genetic resources in their production system context	109
5.4.1	Data collection on characterisation and management of small ruminant by the pastoralists	109
5.4.2	Consent with the livestock keepers	115

6	SUMMARY	116
7	ZUSAMMENFASSUNG	119
8	MUHTASARI	122
9	REFERENCES	125
10	ANNEX	144
10.1	Semi -structured interview (SSI) guide/questions (First field phase)	144
10.2	Data collection sheet (Second field phase)	145
10.3	Activites in the first field phase	157
10.4	Time frame of selecting settlements that maintained purebred goats	158
10.5	Sample sizes of targeted flocks and goats included in performance study	159
10.6	The Gabra and Rendille naming of years and seasons	160
10.7	Age and sex classes in sheep and goats	161
10.8	Functions of sheep and goats differentiated by age and sex classes	167
10.9	Coding categories	177
