Table of contents

Abstract	i
Zusammenfassung	v
Abbreviations	xiii
1 General introduction.....	1
1.1 Origin and distribution of grasshoppers and locusts.....	1
1.2 Biology and ecology of locust and grasshopper	2
1.2.1 The Senegalese grasshopper <i>Oedaleus senegalensis</i>	2
1.2.2 The desert locust <i>Schistocerca gregaria</i>	3
1.2.3 Other Locusts and Grasshoppers	4
1.3 Host plants and economic importance of locusts and grasshoppers	4
1.4 Management options	5
1.4.1 Chemical control strategies.....	5
1.4.2 Biological control as alternative to conventional pesticides	6
1.5 The entomopathogenic fungi.....	6
1.5.1 Life cycle of entomopathogenic fungi	7
1.6 The Microsporidian, <i>Paranosema locustae</i>	8
1.6.1 Transmission and dissemination of <i>Paranosema locustae</i>	9
1.7 The PRéLISS Programme.....	10
1.8 Research objectives	11
2 Evaluation of the persistence of <i>Paranosema locustae</i> (Microsporidia: Nosematidae) in Cape Verde and Senegal, two African ex-release countries of the pathogen	13
2.1 Abstract	13

2.2	Introduction	14
2.3	Materials and methods	15
2.3.1	Site description.....	15
2.3.2	Sampling methods.....	15
2.3.3	Diseases diagnosis.....	16
2.4	Results	17
2.4.1	Grasshopper collection	17
2.4.2	Pathogens detected by microscopic observation	20
2.4.3	Occurrence of <i>P. locustae</i> in collected grasshoppers.....	21
2.5	Discussion.....	23
3	Susceptibility of immature stages of <i>Schistocerca gregaria</i> and <i>Oedaleus senegalensis</i> (Orthoptera: Acrididae) to <i>Paranosema locustae</i> (Microsporidia: Nosematidae) and its vertical transmission in the infected Adults.....	25
3.1	Abstract	25
3.2	Introduction	26
3.3	Material and methods	27
3.3.1	Study organisms	27
3.3.2	Susceptibility of immature stages of <i>S. gregaria</i> and <i>O. senegalensis</i> to <i>P. locustae</i>	27
3.3.3	Effect of <i>P. locustae</i> on host fecundity and its vertical transmission in F1 generation	28
3.3.4	Effect of <i>P. locustae</i> on the growth of <i>O. senegalensis</i> and <i>S. gregaria</i> ..	28
3.3.5	Examination for <i>P. locustae</i> infection	29
3.3.6	Analysis of data.....	29

3.4 Results	30
3.4.1 Susceptibility of immature stages of <i>S. gregaria</i> and <i>O. senegalensis</i> to <i>P. locustae</i>	30
3.4.2 Effect of <i>P. locustae</i> on the host growth	33
3.4.3 Effects of <i>P. locustae</i> infection on host fecundity and its vertical transmission.....	35
3.5 Discussion	38
4 Interaction between <i>Paranosema locustae</i> (Microsporidia: Nosematidae) and Green Muscle[®], <i>Metarhizium anisopliae</i> var. <i>acridum</i> (Deuteromycotina: Hyphomycetes) infecting the desert locust <i>Schistocerca gregaria</i> (Orthoptera: Acrididae)	42
4.1 Abstract	42
4.2 Introduction	43
4.3 Materials and Methods	44
4.3.1 Study organisms	44
4.3.2 Inoculation of hosts.....	45
4.3.3 Data collection.....	46
4.3.4 Analysis of data.....	47
4.4 Results	48
4.4.1 Host mortality.....	48
4.4.2 Pathogen spore production	51
4.5 Discussion	55
5 Field efficacy of <i>Paranosema locustae</i> (Microsporidia: Nosematidae) and Green Muscle[®], <i>Metarhizium anisopliae</i> var. <i>acridum</i> (Deuteromycotina: Hyphomycetes) in wheat bran application for the control of locusts and grasshoppers in Sahel	59

5.1	Abstract	59
5.2	Introduction	60
5.3	Materials and Methods	61
5.3.1	Field Site	61
5.3.2	Bait formulation and application	62
5.3.3	Population structure and cage incubation samples.....	63
5.3.4	Population density monitoring.....	64
5.3.5	Prevalence of <i>P. locustae</i> and its level of infection in field surviving adult <i>O. senegalensis</i> , <i>A. blondeli</i> and <i>P. cognata</i>	64
5.3.6	Analysis of data.....	65
5.4	Results	65
5.4.1	Meteorological conditions.....	65
5.4.2	Population structure	67
5.4.3	Population development	69
5.4.4	Cage incubation	71
5.4.5	Prevalence of <i>P. locustae</i> and its level of infection in field surviving adult <i>O. senegalensis</i> , <i>A. blondeli</i> and <i>P. cognata</i>	73
5.5	Discussion	75
6	General Discussion	79
7	References	87
8	Acknowledgements	108
