Contents

Introduction	1
1 Fundamentals	5
1.1 Phenomenological description of anisotropy and hysteresis	5
1.2 Physical origin of magnetocrystalline anisotropy	13
1.3 Review of the Pr-Co system	17
1.3.1 Crystal structure and intrinsic properties of Pr-Co compounds	18
1.3.2 Extrinsic properties of bulk and thin film Pr-Co magnets . . .	23
2 Experimental techniques	27
2.1 Pulsed laser deposition (PLD)	27
2.2 Chemical characterization	29
2.2.1 Energy/wavelength dispersive X-ray analysis	29
2.2.2 Rutherford backscattering spectrometry (RBS)	30
2.3 Structural characterization	32
2.3.1 X-ray diffraction (XRD)	32
2.3.2 Pole figure analysis	34
2.3.3 Transmission electron microscopy (TEM)	35
2.4 Magnetic characterization	37
2.4.1 Vibrating sample magnetometry (VSM)	37
2.4.2 ac susceptibility	38
3 PrCo₅ films prepared on MgO(100) substrates	41
3.1 Buffer deposition temperature series	41
3.2 PrCo ₅ layer deposition temperature series	44
4 Pr-Co films prepared on MgO(110) substrates	53
4.1 Chemical analysis	54
4.2 Phase formation and crystal structure	55
4.3 Anisotropic magnetic properties	65
4.4 Spin reorientation transition (SRT)	69

5	Temperature dependent anisotropy and spin reorientation of an epitaxial PrCo₅ film	75
5.1	Qualitative interpretation of temperature and angle dependent hysteresis	76
5.2	Analysis of anisotropy constants and spin reorientation angle	83
6	Conclusions and Outlook	87
	References	91
