|--|-----|
| <b>Preface</b><br><i>T. Grundmann</i>  | VI  |
| <b>Preface</b><br><i>M. Kühle-Weidemeier</i>   | IX  |
| <b><u>I Introduction</u></b>   |     |
| <b>MBT in Germany and Europe – Development, Status and Outlook</b><br><i>M. Nelles, G. Morscheck, J. Grünes</i>                          | 1   |
| <b>MBT's Contribution to Climate Protection and Resource Conservation</b><br><i>K. Ketelsen</i>  | 17  |
| <b>Mechanical Biological Treatment (MBT) in the UK- A personal view -</b><br><i>Ph. Russell</i>  | 43  |
| <b><u>II Political, legal and economical frame conditions</u></b>  |     |
| <b>Consequences of the European IE Directive for Plant Operators</b><br><i>S. Meyer</i>  | 49  |
| <b>Revision of Waste Treatment Industries BREF Document – What are the implications for MBT Operators?</b><br><i>M. Kühle-Weidemeier</i> | 63  |
| <b>Marketing Opportunities for German Recycling Technology</b><br><i>N. Denz</i>   | 73  |
| <b>Portability of waste management concepts and technologies</b><br><i>F. Kölsch, C. Heußner, K. Fricke, M. Ginter</i>                   | 77  |
| <b><u>III Consequences of new frame conditions</u></b>   |     |
| <b>Influence of the revised German waste law on the source separated collection of organic waste and recyclables</b><br><i>G. Becker</i> | 85  |
| <b>Adapting Waste Fees to Changing Material Flows</b><br><i>K. Gellenbeck, K. Heuer</i>  | 91  |
| <b>Developments in the trade of emission certificates (CDM)</b><br><i>P. Oligmüller</i>  | 100 |

|   |     |
|---|-----|
| <b>Increasing co-incineration requirements and the utilization of Solid Recovered Fuels (SRF) to realize the best overall environmental outcome</b> | 106 |
| <i>J. Geiping, S. Flamme</i>  |     |
| <b>Material recovery is sensibly amended by incineration – Example mtm Group</b>  | 117 |
| <i>M. Scriba</i>  |     |
| <br><b><u>Session B      International workshop</u></b>   |     |
| <b>The Ten Commandments of Waste</b>  | 130 |
| <i>Ph. Russell</i>  |     |
| <b>Design of MBT plants - a strategy for international markets</b>  | 137 |
| <i>I. Steinberg</i>   |     |
| <b>The full flow wet anaerobic MBT plant in Malta</b>   | 373 |
| <i>V. Magri</i>   |     |
| <b>The Biopole Project: design, construction and start-up of a 75,000 tpa MSW facility</b>  | 149 |
| <i>P. Turba, L. Vizioz</i>  |     |
| <b>Current Status and future role of MBT in Italy</b>   | 168 |
| <i>F. Adani</i>   |     |
| <b>Destinations for the High Calorific Fractions from Mechanical and Mechanical-Biological Treatment</b>  | 177 |
| <i>M. Kühle-Weidemeier</i>  |     |
| <br><b><u>IV      Development potential of MBT technology</u></b>   |     |
| <b>Flexible management for separate treatment of organic and residual waste in one plant at the waste management centre Rhein-Lahn</b>              | 187 |
| <i>G. Müller, A. Warnstedt</i>  |     |
| <b>Material stream specific conversion of disposal plants Example of a further development of the MBT Association of the ZAK</b>                    | 204 |
| <i>J. B. Deubig</i>   |     |
| <b>MBT with integrated utilisation of organic waste</b>   | 217 |
| <i>R. Eitner</i>  |     |
| <b>Extraction of recyclables for reuse from mixed collection</b>  | 227 |
| <i>M. Monzel</i>  |     |

|   |     |
|---|-----|
| <b>DIESELWEST - Realisation of an Industrial Prototype of a Plant for the Production of Oil from the High Calorific Waste Fraction</b><br><i>Ch. Haupts</i>                               | 234 |
| <b>The Utilisation of MBT Fractions in a Concord Blue Reformer</b><br><i>H.J. Mühlen; S. Flahs</i>  | 244 |
| <b>Role of MBT in removal and mining of landfills</b><br><i>St. Gäth, B. Gallenkemper</i>   | 254 |
| <br>  |     |
| <b><u>V Optimisation of MBT</u></b>   |     |
| <b>Optimisation at the MBT Pohlsche Heide with Dry Digestion</b><br><i>Th. Kropp</i>  | 266 |
| <b>Optimisation Approaches at the Example of the MBT of South Lower Saxony</b><br><i>M. Rakete</i>  | 274 |
| <b>Optimisation of the MBS plant ZAB Nuthe-Spree</b><br><i>H. Lingk</i>   | 284 |
| <b>Approaches to MBT Technology Optimization by the Example of RABA Chemnitz (Physical Drying)</b><br><i>J. Schatz, U. Römer</i>  | 293 |
| <b>Integrated Development Concerning a Resource-Efficient Operation of MBT-Processes with RTO-Technology</b><br><i>O. Carlowitz, O. Neese, K. Ketelsen</i>                                | 303 |
| <br>  |     |
| <b><u>VI Anaerobic digestion (AD) of separately collected organic waste (Biowaste) - Operational experience with different technologies</u></b>   |     |
| <b>Organic Waste Treatment through Partial Stream Anaerobic Digestion in the Plug Flow Process (Composting Plant Warendorf)</b><br><i>A. Oechtering</i>                                   | 318 |
| <b>Enlargement of the Composting Plant Gütersloh with a Bio-gas Plant Operating with the KOMPOFERM®-Process</b><br><i>S. Böhme</i>  | 325 |
| <b>Experience with Continuous Dry Digestion Using the Example of the Digestion Plant in Hoppstädten (from the view of the supplier and the operator)</b><br><i>T. Baumann, F. Schwarz</i> | 344 |

---

|  |     |
|--|-----|
| <b>Extension of a Composting Plant by an Anaerobic Step</b>                                | 358 |
| <i>J. Hezel</i>  |     |
| <b>Pre-Treatment of Organic Wastes for Wet Digestion Systems – Technology of Kompotech</b> | 366 |
| <i>M. Wellacher</i>  |     |
