## Contents

Contents.....	I
List of abbreviations.....	V
<b>A</b> Introduction.....	1
1. Granulation .....	1
1.1 Definition and impact .....	1
1.2 Batch versus continuous granulation processes.....	1
1.3 Continuous granulation methods .....	2
2. Twin screw extruder.....	3
2.1 State of the art .....	3
2.2 Screw configuration .....	4
2.2.1 Impact.....	4
2.2.2 Conveying elements .....	4
2.2.3 Kneading elements.....	5
2.2.4 Combing mixer elements.....	6
3. Mixing behaviour of screw elements .....	7
3.1 General aspects.....	7
3.2 Distributive mixing.....	7
3.3 Dispersive mixing.....	8
4. Leistritz Micro GL 27 / 28D .....	8
5. APV MP 19 TC 25.....	9
<b>B</b> Aim of this study .....	10
<b>C</b> Results and Discussion .....	11
1. Impact of the extruder setup on continuous granulation with a twin-screw extruder.....	11
1.1 Impact of screw elements on lactose granules at 2kg/h input rate.....	11
1.1.1 Introduction.....	11
1.1.2 Experimental setup .....	11
1.1.3 Particle size distribution of granules .....	11
1.1.4 Granule porosity .....	14
1.1.5 Granule friability.....	16
1.1.6 Granule flowability .....	17
1.1.7 Scanning electron microscopy.....	19
1.1.8 Tablet tensile strength .....	20
1.1.9 Summary .....	22
1.2 Impact of screw elements on mannitol granules at 2kg/h input rate .....	23
1.2.1 Introduction.....	23
1.2.2 Experimental setup.....	23
1.2.3 Particle size distribution of granules .....	23
1.2.4 Granule porosity .....	25
1.2.5 Granule friability.....	26

1.2.6	Granule flowability .....	28
1.2.7	Tablet tensile strength.....	29
1.2.8	Summary .....	30
1.3	Impact of screw elements on dicalcium phosphate granules at 2kg/h input rate .....	31
1.3.1	Introduction .....	31
1.3.2	Experimental setup .....	31
1.3.3	Particle size distribution of granules .....	31
1.3.4	Granule porosity .....	32
1.3.5	Granule friability.....	33
1.3.6	Granule flowability .....	34
1.3.7	Tablet tensile strength.....	35
1.3.8	Summary .....	36
1.4	Impact of screw elements on lactose granules at 6kg/h input rate.....	37
1.4.1	Introduction .....	37
1.4.2	Experimental setup .....	37
1.4.3	Particle size distribution of granules .....	37
1.4.4	Granule porosity .....	38
1.4.5	Granule friability.....	40
1.4.6	Granule flowability .....	41
1.4.7	Tablet tensile strength.....	42
1.4.8	Summary .....	43
1.5	Impact of screw elements on dicalcium phosphate granules at 6kg/h input rate .....	44
1.5.1	Introduction .....	44
1.5.2	Experimental setup .....	44
1.5.3	Particle size distribution of granules .....	44
1.5.4	Granule porosity .....	46
1.5.5	Granule friability.....	47
1.5.6	Granule flowability .....	49
1.5.7	Tablet tensile strength.....	49
1.5.8	Summary .....	50
1.6	Influence of process parameters on granulation of mannitol.....	51
1.6.1	Introduction .....	51
1.6.2	Experimental setup .....	51
1.6.3	Particle size distribution .....	52
1.6.4	Granule friability.....	55
1.6.5	Summary .....	56
1.7	Summary .....	57
2.	Mixing behaviour of screw elements .....	58
2.1	Distributive mixing.....	58
2.1.1	Introduction .....	58

2.1.2	Experimental setup .....	58
2.1.3	Water content of granules during granulation with two powder feeders	59
2.1.4	Theophylline content of granules during granulation with two powder feeders .....	60
2.2	Dispersive mixing .....	62
2.2.1	Introduction .....	62
2.2.2	Experimental setup .....	62
2.2.3	Dispersive effect on dicalcium phosphate .....	63
2.3	Summary .....	64
3.	Comparison of twin-screw extruders for continuous granulation.....	65
3.1	Introduction .....	65
3.2	Experimental setup .....	65
3.3	Granulation of dicalcium phosphate.....	66
3.3.1	Particle size distribution of granules .....	66
3.3.2	Granule friability.....	70
3.3.3	Granule flowability .....	71
3.3.4	Tablet tensile strength .....	71
3.4	Granulation of lactose .....	73
3.4.1	Particle size distribution of granules .....	73
3.4.2	Granule friability.....	74
3.4.3	Granule flowability .....	74
3.4.4	Tablet tensile strength .....	75
3.4.5	Summary .....	76
D	Summary .....	77
E	Zusammenfassung der Arbeit .....	79
F	Experimental part .....	81
1.	Materials .....	81
1.1	Active pharmaceutical ingredient .....	81
1.2	Binders and Fillers .....	81
1.3	Other substances.....	82
2.	Methods .....	82
2.1	General methods .....	82
2.1.1	Design of experiments .....	82
2.1.2	Sample preparation .....	82
2.2	Manufacturing methods .....	82
2.2.1	Extruder setup for evaluation of the screw impact.....	82
2.2.2	Extruder setup for evaluation of distributive mixing of screw elements.	84
2.2.3	Extruder setup for evaluation of dispersive mixing of screw elements..	84
2.2.4	Extruder setup for granulation of mannitol .....	85
2.2.5	Extruder setup for the comparison of two extruders .....	85
2.2.6	Determination of free chamber volume fraction .....	87
2.2.7	Blending of powders .....	87

2.2.8	Drying and storage of granules.....	87
2.2.9	Compression of granules.....	87
2.3	Characterisation methods.....	88
2.3.1	Sieve analysis.....	88
2.3.2	Granule friability determination with an air jet sieve.....	88
2.3.3	Helium density of granules.....	89
2.3.4	Mercury density of granules.....	89
2.3.5	Granule porosity.....	89
2.3.6	Ring shear cell tester.....	89
2.3.7	Loss on drying.....	91
2.3.8	Water content of granules.....	91
2.3.9	Scanning electron microscopy.....	91
2.3.10	Microscopic analysis of tablets.....	91
2.3.11	Laser diffraction.....	92
2.3.12	UV spectroscopy.....	92
2.3.13	Tensile strength of tablets.....	92
2.3.14	Tablet porosity.....	92
G	Bibliography.....	94
H	Annex.....	100
