

Maria Teresa Almanza (Autor)
**Management of *Bombus atratus* bumblebees to pollinate Lulo
(*Solanum quitoense* L), a native fruit from the Andes of
Colombia**

TABLE OF CONTENTS

1	GENERAL INTRODUCTION	1
1.1	Importance of pollination in crops.....	1
1.2	Fruit producers' profile.....	2
1.3	<i>Solanum quitoense</i>	3
1.4	Andromonoecy in <i>Solanum</i>	5
1.5	Bumblebees of Colombia	6
1.6	Study area	8
1.7	Modeling colony dynamics of <i>Bombus atratus</i>	9
1.8	Proposal for a bumblebee pollination management program.....	11
1.8.1	Objectives and questions.....	12
2	REPRODUCTION OF <i>SOLANUM QUITOENSE</i> AND ITS POLLINATION BY THE NEOTROPICAL BUMBLEBEE <i>BOMBUS ATRATUS</i>	14
2.1	Introduction	14
2.2	Question statement	15
2.3	Materials and methods.....	15
2.3.1	Reproductive system.....	15
2.3.2	Self-incompatibility experiments.....	18
2.3.3	Pollination experiments	20
2.4	Results	21
2.4.1	Development and reproductive phases of <i>Solanum quitoense</i> flowers	21
2.4.2	Physiology of reproductive organs	23
2.4.3	Pollination experiments with bumblebees	32
2.5	Discussion.....	34
2.5.1	Used methods.....	34
2.5.2	Reproductive system of <i>S. quitoense</i>	34
2.5.3	Function of floral morphs	35
2.6	Conclusions	37
3	FORAGING BEHAVIOUR OF THE NEOTROPICAL BUMBLEBEE <i>BOMBUS ATRATUS</i> (FRANKLIN) IN A LULO (<i>SOLANUM QUITOENSE</i>) CULTURE.....	38
3.1	Introduction	38
3.2	Questions	40
3.3	Methods	40
3.3.1	Foraging behaviour on <i>S. quitoense</i> flowers.....	40
3.4	Results	44
3.4.1	Behaviour of individual foragers	44
3.4.2	Colony foraging activity	49
3.4.3	Use of <i>S. quitoense</i> pollen by the colony.....	51
3.5	Discussion.....	52
3.5.1	Methods	52
3.5.2	Individual behavior	52
3.5.3	Colony development	55
3.6	Conclusions	56

4	MODELLING COLONY DYNAMICS OF <i>BOMBUS ATRATUS</i> : FACTORS AFFECTING REARING IN CAPTIVITY AND POLLINATION MANAGEMENT	57
4.1	Introduction	57
4.2	Observation and question statement	57
4.2.1	Methods	58
4.2.2	Superorganism concept to approach system modelling.....	58
4.2.3	Theoretical ecological basis	60
4.2.4	Physiological time.....	65
4.2.5	Laboratory rearing methods.....	66
4.2.6	Parameter estimation though life table	67
4.2.7	Hardware and software	68
4.3	Results	69
4.3.1	Development rate of reared colonies	69
4.3.2	Life table of reared colonies	73
4.3.3	Larva/worker ratio	74
4.3.4	Colony growth simulation.....	75
4.3.5	Supply/Demand ratio and colony growth	78
4.4	Discussion.....	79
4.5	Conclusions	81
5	GENERAL DISCUSSION	82
5.1	Pollination.....	82
5.2	Bumblebee behavior	82
5.2.1	Rearing	83
5.2.2	Colony modeling.....	84
5.3	Management of <i>B. atratus</i> as pollinator: outlook.....	84
5.3.1	Cost/benefit analysis of pollination program with <i>B. atratus</i> colonies in <i>Solanum quitoense</i> crops	84
5.3.2	Actors a pollination program	86
5.3.3	Which other fruit crops could <i>B. atratus</i> potentially pollinate?.....	87
5.3.4	Limitations of the proposed program for pollination management	87
5.3.5	Recommendations.....	88
6	SUMMARY.....	89
6.1	General introduction.....	89
6.2	Breeding system of <i>S. quitoense</i> and its pollination with bumblebees.....	89
6.3	Foraging behavior of <i>B. atratus</i> workers.....	91
6.4	Modeling colony dynamics of <i>B. atratus</i>	94
6.5	General discussion.....	96
6.6	Outlook	97
7	REFERENCES	98
8	APPENDICES	106
