

Contents

1.	Introduction	1
1.1	The goal of this research.....	5
2.	Vehicle crashworthiness investigation and optimization	7
2.1	Introduction to the vehicle crashworthiness investigation	7
2.2	Frontal vehicle crash investigation.....	7
2.3	General optimization problem.....	11
2.4	Response surface method	12
2.5	Experimental design	13
2.5.1	Koshal design	14
2.5.2	Factorial design	14
2.5.3	D-optimality design	14
2.6	Genetic algorithm	15
2.7	Optimization of the frontal vehicle's structure.....	16
3.	Crush performance investigation and optimization of aluminum tubes.....	21
3.1	Introduction to the crush performance of aluminum tubes.....	21
3.2	Crush performance of circular aluminum tubes	25
3.2.1	Analytical investigations	25
3.2.2	Experimental and numerical results	27
3.3	Crush performance of square aluminum tubes	32
3.3.1	Analytical investigations	33
3.3.2	Experimental and numerical results	35
3.4	Multi design optimization of crush behavior of aluminum tubes	40
4.	Crush performance investigation and optimization of filled aluminum tubes	43
4.1	Introduction to the crashworthiness investigation of filled tubes.....	43
4.2	Crush performance investigation of the foam-filled aluminum tubes.....	43
4.2.1	Analytical investigations	45
4.2.2	Experimental and numerical results	47
4.3	Crush performance investigation of honeycomb-filled aluminum tubes	52
4.3.1	Analytical investigations	53
4.3.2	Experimental and numerical results	55
4.4	Crush performance optimization of foam-filled aluminum tubes	61
5.	Bending crush investigation and optimization of empty and filled aluminum beams	64
5.1	Introduction to the crashworthiness of beams under bending load	64
5.2	Analytical investigations	64
5.3	Experimental and numerical results	68
5.4	Crashworthiness optimization of empty and filled beams under bending load.....	73
6.	Crashworthiness investigation and optimization of composite crash box	77

6.1	Introduction to the crush behavior of composite crash box.....	77
6.2	Experimental and numerical results.....	78
6.3	Advanced finite element model	85
6.4	Multi design optimization of crush behavior of square composite crash box.....	89
6.5	Crush performance investigation of foam-filled composite crash box.....	91
7.	Conclusion	94
8.	References.....	97
