### Part I Transport in magnetic semiconductors

---

<b>1</b>	<b>Introduction</b>	3
1.1	Introduction	3
1.2	Dilute magnetic semiconductors – an overview	4
1.3	The transport model	6
1.4	The network model	15
<b>2</b>	<b>Transport in single-phase materials</b>	25
2.1	Introduction	25
2.2	Basic transport equations	26
2.3	A non-Arrhenius transport behavior - indicative for hopping transport?	27
2.4	Influence of disorder on the temperature dependence of the resistivity	28
2.5	Conclusion	32
<b>3</b>	<b>Influence of annealing</b>	33
3.1	Introduction	33
3.2	Model properties	37
3.3	Correlation of transport properties and model parameters	39
3.4	Comparison between theory and experiment	45
3.5	Conclusion	52
<b>4</b>	<b>Non-random Mn incorporation</b>	53
4.1	The Curie temperature – from a global towards a local parameter	53
4.2	Non-random Mn incorporation	60

X        Contents

4.3	Conclusion .....	64
<b>5</b>	<b>Transport in hybrid structures.....</b>	<b>67</b>
5.1	Introduction .....	67
5.2	General model properties .....	70
5.3	Strong enhancement of MR effects .....	88
5.4	Conclusion .....	96
<b>6</b>	<b>Conclusion of part I .....</b>	<b>97</b>
6.1	Conclusion .....	97

---

**Part II Spin-dependent charge-carrier recombination**

---

<b>7</b>	<b>Introduction .....</b>	<b>101</b>
7.1	Introduction .....	101
7.2	Remarks on the experiments .....	102
<b>8</b>	<b>The model .....</b>	<b>104</b>
8.1	Introduction .....	104
8.2	The intermediate-pair concept, a closer look .....	106
8.3	Building blocks of the model .....	107
8.4	The observable .....	109
<b>9</b>	<b>Theoretical description .....</b>	<b>111</b>
9.1	General description – the stochastic Liouville equation .....	111
9.2	Basic equations and conventions .....	112
<b>10</b>	<b>Results in absence of disorder .....</b>	<b>120</b>
10.1	Recombination through pairs without exchange coupling .....	120
10.2	Recombination through exchange-coupled pairs .....	123
<b>11</b>	<b>Influence of disorder .....</b>	<b>129</b>
11.1	Introduction .....	129
11.2	The regime of strong light-field coupling .....	129
11.3	The regime of weak light-field coupling .....	136
<b>12</b>	<b>Conclusion of part II .....</b>	<b>141</b>
12.1	Conclusion .....	141
<b>A</b>	<b>The network model .....</b>	<b>143</b>
<b>B</b>	<b>Dependence of the potential fluctuations on the choice of <math>l</math></b> .....	<b>147</b>

C The thermal average of $S_z$ .....	149
D Temperature dependence of the spontaneous magnetization	151
E The product-basis representation of $\mathcal{H}_0$ .....	153
F The Bloch equations .....	157
G On the definition of the magnetic-field strength.....	159
H Influence of the g-factor distribution of an ensemble of IPs	161
References .....	168
List of constants .....	177
List of publications .....	184
Acknowledgements .....	186
Biography .....	188
