

TABLE OF CONTENTS

1	INTRODUCTION	1
2	AGRO-ECOLOGICAL CONDITIONS IN THE OUEME BASIN	3
2.1	Location and geography	3
2.2	Climate	3
2.3	Soil	4
2.4	Vegetation	5
2.5	Population dynamics	7
2.6	Land property rights	9
2.7	Agro-ecological Zone	11
2.8	Major crops	13
2.9	Animal husbandry	14
2.10	Farming systems	15
3	MATERIALS AND METHODS IN GENERAL	17
3.1	Eco-volume and bio-volume	17
3.2	Reconstructing vegetation dynamics	19
3.3	Datasets	20
3.4	Experimental geographical grid	21
3.5	Experimental farming systems grid	22
3.6	Farm interview	24
3.7	Parameters and variables	25
3.8	Interpolation	27
3.9	Statistical analyses	27
4	FARMING SYSTEMS IN THE OUEME BASIN	28
4.1	Literature review	28
4.2	Material and method	28
4.3	Results and discussion	29
4.3.1	Crop calendar and crop rotation	29
4.3.1.1	South Oueme	29
4.3.1.2	Middle Oueme	34
4.3.1.3	North Oueme	36
4.3.2	CIC and modifying Ruthenberg's value	38
4.3.3	Intercropping	41
4.3.4	Case study mango	42

4.4	Partial conclusion	48
5	LITTER FALL IN FOREST AND PLANTATION.....	49
5.1	Introduction	49
5.2	Material and method	49
5.3	Results and discussion	50
5.4	Partial conclusions	54
6	SPATIAL VEGETATION DYNAMICS.....	56
6.1	Introduction	56
6.1.1	Objective	56
6.1.2	Hypothesis.....	56
6.2	Material and method	56
6.3	Results and discussion	58
6.3.1	Vegetation parameters in four test communes	58
6.3.1.1	Measured vegetation parameters	58
6.3.1.2	Weighted parameters of annual crops	60
6.3.1.3	Aggregated parameters of three vegetation types.....	64
6.3.2	Integrated vegetation parameters of 62 communes	65
6.3.3	Integrated vegetation parameters and agro-ecological factors in ten departments.....	66
6.3.4	Relations among vegetation parameters	67
6.3.4.1	Communal level.....	67
6.3.4.2	Department level.....	68
6.3.4.3	Within Impetus zones.....	69
6.3.5	Relations between vegetation dynamics and agro-ecological factors.....	72
6.3.5.1	Communal level.....	72
6.3.5.2	Department level.....	78
6.3.5.3	Within Impetus zones.....	80
6.4	Partial conclusions	87
7	TEMPORAL AND SPATIAL VEGETATION DYNAMICS.....	90
7.1	Introduction	90
7.1.1	Objective	90
7.1.2	Hypotheses	90
7.2	Material and method	90

7.3	Results and discussion	91
7.3.1	Relations among vegetation parameters	91
7.3.1.1	<i>Within the whole Oueme Basin</i>	91
7.3.1.2	<i>Relations by General Linear Model</i>	92
7.3.2	Relations between vegetation dynamics and agro-ecological factors.....	95
7.3.2.1	<i>Relations within four test communes</i>	95
7.3.2.2	<i>Relations by Multiple Regression</i>	96
7.3.2.3	<i>Relations by General Linear Model within Impetus Zones</i>	99
7.4	Partial Conclusion	102
8	SCENARIOS OF VEGETATION DYNAMICS AND ECO-PRECIPIATION	103
8.1	Introduction	103
8.1.1	Objective	103
8.1.2	Hypothesis.....	104
8.2	Material and method	105
8.3	Scenarios of vegetation dynamics	105
8.3.1	Model description	105
8.3.2	Observed vegetation dynamics	107
8.3.3	Predicted vegetation dynamics.....	109
8.3.4	Observed vs. predicted.....	110
8.4	Scenarios of eco-precipitation	112
8.4.1	Model description	112
8.4.1.1	<i>Static regional model</i>	112
8.4.1.2	<i>Temporal and regional model</i>	114
8.4.2	Observed vs. predicted precipitation 2004	116
8.5	Partial Conclusion	122
9	GENERAL CONCLUSION	123
10	REFERENCES	126
11	ANNEXES	134
