

Table of contents

Acknowledgments	i
Table of contents.....	ii
Chapter 1: General introduction	1
1.1 Investigation of genetic variation	1
1.2 Physiography, climate and vegetation of Ethiopia	2
1.3 <i>Cordia africana</i> Lam.	5
1.3.1 Taxonomy and botanic description.....	5
1.3.2 Natural distribution and habitat	7
1.3.3 Reproductive biology.....	8
1.3.4 Uses and economic importance	8
1.4 Objectives	9
1.4.1 General objective	9
1.4.2 Specific objectives	9
Chapter 2: Variation at Amplified Fragment Length Polymorphisms	10
2.1 Introduction.....	10
2.2 Materials and Methods.....	11
2.2.1 Sampling and plant material collection	11
2.2.2 Laboratory investigations	14
2.2.3 AFLP reproducibility.....	16
2.2.4 AFLP fragment scoring	16
2.2.5 AFLP data analyses	17
2.3 Results.....	19
2.3.1 Genetic variation within populations.....	19
2.3.2 Population genetic structure.....	21
2.4 Discussion.....	26
2.4.1 Genetic variation within populations.....	26
2.4.2 Population genetic structure.....	29
Chapter 3: Genetic effects of forest fragmentation in SW Ethiopia	34
3.1 Introduction.....	34
3.2 Materials and Methods.....	35
3.2.1 Sampling and plant material collection	35
3.2.2 Genetic Data Generation.....	36

3.2.3	Analysis of variation within and among subpopulations.....	37
3.2.4	Association among AFLP loci.....	37
3.3	Results.....	38
3.3.1	Within subpopulation genetic variation and association among loci	38
3.3.2	Genetic variation among subpopulations.....	39
3.3.3	Population structure based on assignment of individuals.....	42
3.4	Discussion.....	43
Chapter 4: Variation at chloroplast microsatellites.....		47
4.1	Introduction.....	47
4.2	Materials and Methods.....	48
4.2.1	Chloroplast Microsatellites	48
4.2.2	Genetic diversity and population differentiation	50
4.3	Results.....	51
4.3.1	Variation at cpSSRs	51
4.3.2	Haplotype variation.....	51
4.4	Discussion.....	53
Chapter 5: Marker assisted designation of tree seed zones		55
5.1	Introduction.....	55
5.2	Materials and Methods.....	56
5.2.1	Identification of seed zones	56
5.2.2	Analysis of molecular variance at AFLPs among the species seed zones.....	56
5.2.3	Analysis of variance of morphological traits among the species seed zones	56
5.3	Results.....	57
5.3.1	AFLP population structure along the species seed zones	57
5.3.2	Morphometric variations along the species seed zones	57
5.4	Discussion.....	60
Chapter 6: General Discussion and Conclusions.....		63
Chapter 7: Summary		67
Chapter 8: Zusammenfassung.....		70
References.....		73
Appendices.....		87
