<b>1 Introduction</b>	<b>1</b>
<b>2 Terahertz Time Domain Spectroscopy</b>	<b>4</b>
2.1 Standard TDS System Based on Ti:Sapphire laser . . . . .	4
2.1.1 THz Antennas . . . . .	6
2.1.2 Examples of Application of THz TDS . . . . .	9
2.2 THz Generation with a 1040 nm fs VECSEL Diode . . . . .	10
2.2.1 Ultrafast VECSEL Diode . . . . .	11
2.2.2 GaAsSb THz Antennas . . . . .	12
2.2.3 Setup and Experimental Results . . . . .	13
2.3 Terahertz Spectrometer Based on a 1550 nm Femtosecond Laser . . . . .	17
2.3.1 1550 nm Fibre Laser . . . . .	17
2.3.2 Novel Material System for 1550 nm . . . . .	18
2.3.3 Setup and Experimental Results . . . . .	20
2.3.4 Excitation of the InGaAs Antennas with 800 nm . . . . .	22
2.4 Conclusions . . . . .	26
<b>3 Continuous Wave Terahertz Spectroscopy</b>	<b>30</b>
3.1 Photomixing Theory . . . . .	30
3.1.1 Generation of Continuous Wave THz Radiation . . . . .	31
3.1.2 Thermal Detection of THz Waves . . . . .	35
3.1.3 Coherent Detection of the THz Radiation. . . . .	37
3.2 CW THz Generation with Two DBR Laser Diodes . . . . .	38
3.2.1 Laser Setup . . . . .	39
3.2.2 CW THz setup . . . . .	41
3.2.3 Measuring Scheme and Controlling Software . . . . .	42
3.2.4 Photomixers . . . . .	43
3.2.5 Polarisation of Constituting Beams . . . . .	48
3.2.6 Application of the Continuous Wave Spectrometer . . . . .	48
3.3 Coherent Detection of the THz Radiation . . . . .	51
3.3.1 Basic Setup Configuration for Coherent Detection . . . . .	51
3.3.2 Continuous Wave THz Spectrometer and Imaging System . . . . .	53
3.4 1064 nm LSB:Microchip Laser for Photomixing . . . . .	61
3.5 THz Generation with a Single 1064 nm Two-Colour DFB Laser . . . . .	64

<b>4</b>	<b>Material Parameter Extraction</b>	<b>68</b>
4.1	Standard Parameter Extraction Algorithm . . . . .	70
4.2	Highly Accurate Material Parameter Extraction . . . . .	73
4.2.1	Theoretical Transfer Function . . . . .	74
4.2.2	Fitting Model to the Experimental Data . . . . .	75
4.2.3	Thickness Determination . . . . .	76
4.2.4	Noise and Instability Analysis . . . . .	77
4.2.5	Spatially Variant Moving Average Filter . . . . .	80
4.2.6	Experimental Verification . . . . .	82
4.3	Spectroscopy of Multilayer Structures . . . . .	86
4.3.1	Transfer Function for Multilayer Layer Samples . . . . .	87
4.3.2	Experimental Verification . . . . .	90
4.4	Conclusions . . . . .	94
<b>5</b>	<b>THz Properties of Liquid Crystals</b>	<b>95</b>
5.1	Theoretical Introduction to Liquid Crystals . . . . .	95
5.1.1	Phases of Liquid Crystals . . . . .	96
5.1.2	Liquid Crystals in Electric Fields . . . . .	97
5.1.3	Effect of Boundaries and Fréedericksz Transition . . . . .	98
5.1.4	Optical Properties . . . . .	101
5.2	Spectroscopy of Liquid Crystals . . . . .	101
5.2.1	Setup and Experiment Description . . . . .	101
5.2.2	5CB . . . . .	103
5.2.3	6CB . . . . .	106
5.2.4	7CB . . . . .	108
5.2.5	8CB . . . . .	110
5.3	Conclusions . . . . .	112
<b>6</b>	<b>Terahertz Reflectors and a Switchable THz Mirror</b>	<b>113</b>
6.1	Omnidirectional Dielectric Mirror . . . . .	114
6.2	Broadband Ceramic Mirror . . . . .	116
6.3	Liquid Crystals Based Switchable THz Reflector. . . . .	117
<b>7</b>	<b>Conclusions</b>	<b>120</b>
	<b>References</b>	<b>122</b>
	<b>List of Publications</b>	<b>130</b>
