Contents

1 Introduction **3**

2 The antiferromagnetic S = 1/2 Heisenberg chain model **8**
2.1 Hamiltonian 8
2.2 Thermodynamic properties of the isotropic AFHC model 14
2.2.1 Magnetization 14
2.2.2 Specific heat 16
2.3 Dynamical structure factor 17
2.3.1 Field and temperature dependence of $S(q, \omega)$ 18
2.4 Determination of $1/T_1$ by means of conformal field theory 24

3 Nuclear magnetic resonance **31**
3.1 Magnetization and susceptibility 31
3.2 Static hyperfine fields 34
3.2.1 Types of hyperfine fields 35
3.2.2 Dipole-dipole coupling 36
3.2.3 Fermi contact exchange 38
3.2.4 Shielding tensor 38
3.2.5 Quadrupole interaction 39
3.2.6 Rotation of magnetic hyperfine fields 41
3.3 Level splitting in the presence of hyperfine fields 41
3.3.1 The nuclear Zeeman effect - magnetic splitting 41
3.3.2 Quadrupolar splitting 43
3.4 Dynamic hyperfine fields 44
3.4.1 Magnetic fluctuations - The Bloch equations 45
3.4.2 Measurement of relaxation times - pulse sequences 47
3.4.3 Measurement of T_2 - spin decoherence 48
3.4.4 Measurement of T_1 - scattering with quasiparticles 49
3.5 Relaxation in the presence of Zeeman and quadrupolar splitting 50
3.6 Spin-lattice relaxation caused by magnetic fluctuations 52
3.7 Spin-spin relaxation due to indirect coupling 53
3.8 Instrumental setups 53

4 The spin chain systems CuPzN and PhnCuCl **57**
4.1 Copper Pyrazine Dinitrate (CuPzN) 57
4.1.1 Magnetic exchange mechanisms 60
4.1.2 Sample preparation 62
4.1.3 Review of experiments from the literature 62
4.2 Bisphenazinium Copper Tetrachloride (PhnCuCl) 71
4.2.1 Crystal structure 71
4.2.2 Sample preparation 73

5 Results and discussion of the thermodynamic experiments **76**
5.1 Copper Pyrazine Dinitrate 76
5.1.1 Magnetization 76
5.2 Bisphenazinium Copper Tetrachloride 78
5.2.1 Magnetization 78
5.2.2 Specific heat 85
5.2.3 Conclusion 88

6 Results and discussion of the NMR experiments **90**
6.1 Copper Pyrazine Dinitrate 90
6.1.1 ^{13}C NMR: Static properties and hyperfine coupling mechanisms . . . 92
6.1.2 ^{13}C NMR: Comparison of dynamics with QMC calculations 103
6.1.3 ^{13}C NMR: Comparison of dynamics with analytical theory 110
6.1.4 ^{14}N NMR: Static properties and hyperfine coupling 114
6.1.5 Conclusion 124
6.2 Bisphenazinium Copper Tetrachloride 126
6.2.1 Calibration of the cryomagnet 127
6.2.2 ^{1}H NMR: Static properties and hyperfine coupling 130
6.2.3 ^{1}H NMR: Field- and temperature-dependent dynamics 137
6.2.4 ^{35}Cl NMR: Comparison with the ^{1}H results 141
6.2.5 Discussion of four typical first-approach scenarios 144
6.2.6 Conclusion 145

7 Summary **147**
