TABLE OF CONTENT	i
ABBREVIATIONS.....	iii
LIST OF TABLES	iv
LIST OF FIGURES	v
1 INTRODUCTION	1
2 LITERATURE REVIEW	3
2.1 Seed germination and their dormancy	3
2.2 Processes of deterioration in seeds during storage	4
2.2.1 Cell structure change	4
2.2.2 Lipid changes	4
2.2.3 Protein changes	7
2.2.4 Enzyme activity changes.....	8
2.2.5 Antioxidants and scavenging enzymes on seed aging	8
2.2.6 Respiration	11
2.3 Factors affecting the oilseed rape deterioration	12
2.3.1 Genetics of seed	12
2.3.2 Seed maturity	12
2.3.3 Seed history and damaged seed.....	13
2.3.4 Seed moisture	13
2.3.5 Temperature.....	15
2.4 Aim of present investigation	15
3 MATERIALS AND METHODS.....	16
3.1 Seed material treatments and preparation	16
3.2 Evaluation of the seed quality	17
3.2.1 Seed moisture content (ISTA, 1999)	17
3.2.2 Seed germination test by top paper method	17
3.2.3 Seed germination by soil test	17
3.2.4 Vigour test by cold test.....	17
3.2.5 Vigour test by accelerated aging test	17
3.3 Analytical methods	18
3.3.1 Oil content.....	18

3.3.2	Fatty acid composition	18
3.3.3	Lipid peroxidation	18
3.3.4	Peroxide values.....	19
3.3.5	Determination of mono- and disaccharides.....	20
3.3.6	Determination of lipoxygenase (LOX) activity	20
3.3.7	Determination of peroxidase (POX) activity	20
3.3.8	Determination of ascorbate peroxidase (APX) activity	21
3.3.9	Determination of catalase (CAT) activity	21
3.3.10	Determination of tocopherols	22
3.4	Statistical analysis	22
4	RESULTS AND DISSCUSSION.....	23
4.1	The effect of storage temperature on seed qualities of different rapeseed	23
4.1.1	Results (2004 experiment).....	23
4.1.2	Results (2005 experiment).....	29
4.1.3	Discussion.....	35
4.2	Biochemical changes in oilseed rape during storage under different conditions.	39
4.2.1	Results	39
4.2.2	Discussion.....	50
4.3	Activity of scavenging enzymes and tocopherol contents of rapeseeds under different storage conditions.	57
4.3.1	Results	57
4.3.2	Discussion.....	71
5	GENERAL CONCLUSION	76
6	SUMMARY	79
7	REFERENCE	80
8	APPENDICES	93
