Contents

1	Introduction	1
1.1	Focus of this Thesis	1
1.2	Contributions of this Thesis	3
1.3	Organization	4
2	Mathematical Preliminaries	7
2.1	Linear Algebra	7
2.2	Linear and Integer Linear Programming	8
2.3	Graphs and Hypergraphs	10
2.4	Walks, Paths, and Connectivity	11
2.5	Independence systems and Matroids	13
2.6	Computational Complexity and Approximation	14
3	Internet Routing and Planning Problems	21
3.1	History of the Internet	21
3.2	Architecture and Basic Functionality	22
3.3	Shortest Path Routing	24
3.4	Optimization Problems in IP networks	28
3.5	Mathematical Model	31
I	Metrics and Routing Paths	37
4	The Inverse Unique Shortest Paths Problem	39
4.1	Related Work	40
4.2	Problem Definition	41
4.3	Finding Real-Valued Lengths	44
4.4	Inapproximability Results for Integer Lengths	47
4.5	An LP-Rounding Algorithm	56
4.6	Unique Shortest Path Forwardings	60
4.7	Concluding Remarks	66
5	Unique Shortest Path Systems	69
5.1	Related Work	70

5.2	Basic Definitions and Observations	71
5.3	Properties of Unique Shortest Path Systems	75
5.4	Finding Irreducible Non-Unique Shortest Path Systems	81
5.5	Finding Maximum Unique Shortest Path Systems	90
5.6	Undirected Unique Shortest Paths Systems	96
5.7	Unique Shortest Path Forwardings	103
II Hardness and Approximability		111
6	Approximability of Unsplittable Shortest Path Routing	113
6.1	Related Work	115
6.2	Unsplittable Shortest Path Routing Problems	117
6.3	Relation to Other Routing Schemes	120
6.4	Inapproximability Results	124
6.5	General Approximation Algorithms	137
6.6	Special Cases	144
6.7	Concluding Remarks	153
III An Integer Programming Solution Approach		155
7	Integer Linear Programming Models	157
7.1	Related Work	158
7.2	Basics	161
7.3	Path Routing Formulations	164
7.4	Arc Routing Formulations	167
7.5	Solving the LP Relaxations	174
7.6	Strength of the LP Relaxations	186
8	Valid Inequalities	193
8.1	Routing Inequalities	194
8.2	Superadditive Metric Inequalities	201
8.3	Precedence Constrained Knapsack Inequalities	209
9	Implementation and Computational Results	221
9.1	Modeling the Real Problem	222
9.2	Implementation	237
9.3	Computational Results	247
9.4	Conclusions and Future Work	259
Bibliography		261
Index		277
