Contents

1	Introduction and scope of work	1
2	Theoretical background	4
2.1	Chlorinated ethenes as groundwater contaminants	4
2.1.1	Physical and chemical properties of chlorinated ethenes	4
2.1.2	Chlorinated ethene degradation in the environment	5
2.2	Groundwater flow, transport and reaction modelling	9
2.2.1	Advection	9
2.2.2	Dispersion	9
2.2.3	Diffusion	10
2.2.4	Adsorption	11
2.2.5	Degradation	13
2.2.6	Combined differential transport equations	16
2.2.7	Boundary conditions	17
2.3	Risk assessment approach for groundwater contaminations	18
2.3.1	Classification of brownfield sites	18
2.3.2	Risk management concepts	20
2.3.3	Health risk assessment approaches	22
3	Experimental area	26
3.1	Geological setting and contaminant release	26
3.2	Field measurements	28
4	Laboratory and soil column experiments	34
4.1	Adsorption and retardation soil column experiment	34
4.1.1	Materials and methods	34
4.1.2	Results of the experiment	35
4.2	Batch experiment of chlorinated ethene degradation	37
4.2.1	Materials and methods	37
4.2.2	Results of the experiment	39
4.2.3	Modelling of the batch test experiment	42
4.3	Characterisation of chloroethene-degrading bacteria	45
4.3.1	Materials and methods	45
4.3.2	Results of the experiment	47

5	Finite Element groundwater modelling	50
5.1	Steady-state Finite Element model.....	51
5.1.1	Definition of model domain and initial conditions.....	51
5.1.2	Setup and calibration of the hydraulic model.....	53
5.1.3	Setup and calibration of the transport and reaction model.....	54
5.2	Model results and model optimisation	56
5.2.1	Sensitivity analysis.....	56
5.2.2	Monte-Carlo simulation for calculation of probability isolines.....	58
5.2.3	Model optimisation using Monte-Carlo method	61
5.3	Development of a redox-dependant degradation kinetic.....	67
5.3.1	Formulation of the problem and conceptual approach.....	67
5.3.2	Monod-based model using electron-acceptor inhibition kinetic.....	70
5.3.3	Setup of a transect model	75
6	Risk assessment approach	80
6.1	Background and model assumptions.....	80
6.2	Modelling health risk.....	83
6.2.1	Cancer risk approach.....	83
6.2.2	Hazard Quotient approach	88
7	Summary and discussion	93
8	Outlook and future prospects	97
9	Nomenclature	99
10	References	103
11	Appendix.....	110
