Contents

1. Introduction to Heterodyne Observations at THz-Frequencies	1
1.1. THz-Astronomy	4
1.2. THz Receivers	7
1.2.1. Description of a Heterodyne System	8
1.2.2. Direct Detector	10
1.2.3. Detector Technology for CONDOR	11
2. The CONDOR Receiver	13
2.1. The Observatories	13
2.2. The Optics	15
2.2.1. The Diplexer	16
2.3. The Local Oscillator	17
2.3.1. FIR-Laser	18
2.3.2. Solid State LOs	20
2.3.3. Summary	22
2.4. The Mixing Device	22
2.4.1. Description of a Hot Electron Bolometer	24
2.5. The Intermediate Frequency	28
2.5.1. The Backends	30
2.6. Summary	31
3. CONDOR Cooling System	33
3.1. Cooling Systems	33
3.2. Liquid He Cryostat	34
3.3. Closed-Cycle Coolers	37
3.3.1. Recuperative Coolers	38
3.3.2. Reversible Coolers	39
3.3.3. Losses of Realistic Coolers	46
3.4. Coolers for CONDOR	47
3.4.1. Pulse-Tube Cooler for CONDOR on APEX	49
3.4.2. Pulse-Tube Cooler Description and First Test	49

4. The CONDOR Cryostat	53
4.1. Requirements for the Cryostat	53
4.2. Thermal Expansion and Isolation of Different Materials	55
4.2.1. Measurements of Different Materials	56
4.2.2. Use of Thermal Isolators Inside the Cryostat	58
4.3. Temperature stability	59
4.3.1. Temperature Fluctuation of the Pulse-Tube Cooler	61
4.3.2. Compensating Thermal Fluctuations	61
4.4. Vacuum Windows and IR-Filter	66
4.4.1. Measurements of Miscellaneous Materials	69
4.4.2. Choice of Material for Vacuum Window	73
4.4.3. Choice of Material for IR-Filter	74
4.5. Design and Construction of the Cryostat	79
4.5.1. Calculations of the Thermal Conductivity of the Wires	81
4.5.2. Description of the Cryostat	84
4.6. Tests with the Cryostat	86
4.6.1. Leakage rate	86
4.6.2. Cool Down and Heat Up Cycles	86
4.6.3. Verifying the Reduction of the Temperature Fluctuations	88
4.7. Summary	89
5. Characterizing CONDOR	91
5.1. Characterization of a Heterodyne Receiver	91
5.1.1. Sensitivity	93
5.1.2. Stability	96
5.2. Laboratory Test	97
5.2.1. Receiver Temperature	98
5.2.2. Stability	104
5.2.3. The Beam	105
5.3. Summary	108
6. First Light Observations on APEX	109
6.1. Brief Description of APEX	109
6.1.1. Atmospheric Transmission	109
6.2. Installation	110
6.3. Performance of CONDOR at the Telescope	115
6.3.1. Temperature Stability of the Cryostat	115
6.3.2. Noise Temperature	115
6.3.3. Stability of the Receiver	116
6.4. Pointing and Calibration	119
6.4.1. Pointing	119
6.4.2. Calibration	122

6.5. Astronomical Observations	124
6.5.1. Orion FIR4	126
6.5.2. Further Observations	128
6.6. Summary	132
7. Outlook	133
A. Appendix	135
A.1. FIR-laser	135
A.2. Intermediate Frequency Chain	138
A.3. Calculating the Allan Variance	140
