

Table of Contents

Table of Contents	ii
Abbreviations.....	v
Index of Figures and Tables	vii
1 Introduction and Outline	1
1.1 Introduction	2
1.2 Outline	4
2 Theoretical Background.....	7
2.1 Stress and the Brain: From Adaptation to Disease	8
2.1.1 Defining Stress.....	8
2.1.2 Acute Stress	9
2.1.3 Stress Neurocircuitry	9
2.1.4 Dynamics of the Stress Response: Role of Corticosteroid Receptors....	10
2.1.5 Molecular and Cellular Changes	12
2.1.6 From Adaptation to Disease: Role of Altered GR Signaling	12
2.2 The Glucocorticoid Receptor	15
2.2.1 Molecular Mechanisms of Glucocorticoid Action	15
2.2.2 Glucocorticoid Receptor Structure.....	18
2.2.3 Genetic Organization.....	18
2.2.4 GR Splice Variants	19
2.2.5 Translational Isoforms	22
2.2.6 Post-translational Modifications.....	23
2.2.7 Polymorphisms of the GR	23
2.3 References	28
3 Sex Specific Associations between Common Glucocorticoid Receptor Gene Variants and Hypothalamus-Pituitary-Adrenal Axis Responses to Psychosocial Stress	36
3.1 Summary	37
3.2 Introduction	38
3.3 Methods and Materials.....	40
3.3.1 Subjects	40
3.3.2 Experimental Protocol	40
3.3.3 Blood and Saliva Sampling	41
3.3.4 Biochemical Analyses	41

3.3.5	DNA Extraction and Genotyping.....	41
3.3.6	Statistical Analyses	42
3.4	Results.....	42
3.4.1	Genotyping.....	42
3.4.2	TSST	44
3.5	Discussion	48
3.6	References	53
4	Association of Common Glucocorticoid Receptor Gene Variants with Sensitivity to Glucocorticoids in Different Tissues	57
4.1	Summary	58
4.2	Introduction.....	59
4.3	Methods.....	61
4.3.1	Subjects and Study Design	61
4.3.2	Dexamethasone Suppression Test (DST).....	62
4.3.3	Skin Vasoconstriction Assay	62
4.3.4	Dexamethasone Suppression of IL-6 Production in Leukocytes	63
4.3.5	Biochemical Analyses	63
4.3.6	DNA Extraction and Genotyping.....	63
4.3.7	Statistical Analyses	63
4.4	Results.....	64
4.4.1	Genotyping.....	64
4.4.2	Dexamethasone Suppression Test	66
4.4.3	Skin Blanching.....	68
4.4.4	GC sensitivity of cytokine production.....	69
4.4.5	Intercorrelations.....	71
4.5	Discussion	74
4.6	References	80
5	Sex Specific Associations between GR Polymorphism A3669G in Exon 9beta and Working Memory Performance.....	83
5.1	Summary	84
5.2	Introduction.....	85
5.3	Methods.....	87
5.3.1	Subjects	87
5.3.2	Working Memory Task	87
5.3.3	DNA Extraction and Genotyping.....	88

5.3.4	Cortisol Measures	88
5.3.5	Statistical Analyses	88
5.4	Results.....	89
5.4.1	Genotypes.....	89
5.4.2	Cortisol Levels.....	90
5.4.3	Effects of Task Exposure Sequence and Treatment	91
5.5	Discussion	95
5.6	References	99
6	The Influence of CBG on the Activity of the Hypothalamus-Pituitary-Adrenal Axis in Men, and in Women Using Oral Contraceptives.....	101
6.1	Summary	102
6.2	Introduction	103
6.3	Methods.....	104
6.3.1	Subjects	104
6.3.2	Experimental Protocol	104
6.3.3	Blood and Saliva Sampling	105
6.3.4	Biochemical Analyses	105
6.3.5	Statistical Analyses	106
6.4	Results.....	106
6.4.1	CBG Levels	106
6.4.2	TSST	107
6.4.3	Synacthen (ACTH ₁₋₂₄) Stimulation Test.....	109
6.4.4	Dexamethasone Suppression Test	110
6.4.5	Diurnal Profile.....	111
6.5	Discussion	111
6.6	References	115
7	General Discussion	117
8	Outlook.....	128
8.1	Whole Genome Associations Studies.....	129
8.2	Imaging Genomics.....	129
8.3	Gene-Environment Interactions and Epigenetics.....	130
8.3.1	Gene-Environment Interactions.....	131
8.3.2	Epigenetics.....	132
8.4	References	135
