Abstract v

Kurzfassung vii

List of Publications xiii

1 Introduction 1
- 1.1 Contributions . . . 2
  - 1.1.1 Traffic Engineering . . . 2
  - 1.1.2 Multi-Class IP/MPLS Networks . . . 3
  - 1.1.3 Demand Uncertainty . . . 3
- 1.2 Outline . . . 3

2 Network Planning and Optimization 5
- 2.1 Terminology . . . 5
- 2.2 Network Planning and Management . . . 7
- 2.3 Optimization Approaches . . . 9
  - 2.3.1 Linear Programming . . . 10
  - 2.3.2 Greedy Heuristics . . . 14
  - 2.3.3 Plain Local Search . . . 14
  - 2.3.4 Simulated Annealing . . . 17
  - 2.3.5 Genetic Algorithms . . . 19
  - 2.3.6 Hybridization . . . 21

3 Overview of IP Routing 25
- 3.1 Classical IP Networks . . . 27
- 3.2 IP/MPLS Networks . . . 31
- 3.3 Differentiated Services . . . 33

4 Traffic Engineering in Classical and Transitional IP Networks 37
- 4.1 Metric-Based Traffic Engineering . . . 37
  - 4.1.1 Problem Formulation . . . 39
  - 4.1.2 Minimizing Weight Changes . . . 43

4.1.3 A Hybrid Genetic Algorithm Approach . . . 44
4.1.4 Computational Results . . . 46
4.2 Traffic Engineering in Hybrid IGP/MPLS Environments . . . 49
4.2.1 Problem Formulation . . . 50
4.2.2 Solving with a Genetic Algorithm . . . 53
4.2.3 Results and Discussion . . . 55
4.3 Partial Demand Increase . . . 58
4.3.1 Notations . . . 59
4.3.2 Policy and Reoptimization . . . 59
4.3.3 Analysis . . . 62
4.4 Some Aspects Looking for a Chapter . . . 64
4.4.1 Better Lower-Bounds . . . 65
4.4.2 Network Failures . . . 67
4.4.3 Network Dimensioning . . . 68

5 Routing and Dimensioning of Multi-Class IP/MPLS Networks 71
5.1 Joint LSP Design and Weight Setting . . . 71
5.1.1 Problem Description . . . 73
5.1.2 A Solving Strategy . . . 76
5.1.3 Results and Analysis . . . 77
5.2 Network Dimensioning . . . 80
5.2.1 Mathematical Formulation . . . 81
5.2.2 A Heuristic Approach . . . 85
5.2.3 Computational Results . . . 88
5.3 Network Dimensioning with Protection . . . 91
5.3.1 Mathematical Models . . . 92
5.3.2 Solving with Heuristics . . . 95
5.3.3 Comparison . . . 97
5.4 LSP Design for Multi-Class IP/MPLS Networks . . . 97

6 Routing Optimization under Demand Uncertainty 101
6.1 Asymmetrical Models . . . 102
6.1.1 Outbound Demand Models . . . 103
6.1.2 Traffic Engineering under Outbound Traffic Constraints . . . 104
6.1.3 Inbound Demand Models . . . 107
6.1.4 Case Study . . . 109
6.2 Symmetrical Models . . . 113
6.3 Partially Uncertain Demands . . . 114
6.3.1 Problem Description . . . 115
6.3.2 Results and Analysis . . . 117

7 Summary and Outlook 121

A Hints for LSP Design under Demand Uncertainty **123**

B Acronyms **125**

List of Figures **127**

List of Tables **131**

Bibliography **133**

Curriculum Vitae **141**
