Contents

1	Introduction	13
1.1	Overview	13
1.2	Contribution of this book	15
1.3	Book Organization	15
2	Related work	19
2.1	Biped robot research on universities and institutes	19
2.1.1	Early researchers	19
2.1.2	Flamingo robot at Massachusetts Institute of Technology (MIT)	21
2.1.3	Dinosaur biped robot Troody	22
2.1.4	Biped Robot WABIAN-2	23
2.2	Research low-cost biped robots	25
2.2.1	Biped robots at University of Freiburg	25
2.2.2	Biped robots at University of Western Australia	25
2.3	Commercial projects	28
2.3.1	Honda biped robot ASIMO	28
2.3.2	HUBO biped robot at Korea Advanced Institute of Sci- ence & Technology (KAIST)	31
2.3.3	Sony biped robot SDR-4X II	31
2.3.4	Shadow robot company “Shadow Robot”	31
2.3.5	Toyota humanoid robots	35
2.3.6	Toyota mountable, walking robot “i-foot”	35
2.4	Commercial low-cost biped robots	37
2.4.1	Biped robot Andy DroidII by Tribotix	37
2.4.2	Biped Robot CycloidII by Robotics	37
2.4.3	Robot base, RoboSapien	37
2.5	Summary	41

3	Robot's hardware design	43
3.1	Introduction	43
3.2	Mechanical structure	43
3.2.1	Previous prototypes	44
3.2.2	A stable prototype	45
3.2.2.1	Modular Design	49
3.3	Electronic	51
3.3.1	Actuators	51
3.3.2	Microcontroller boards	52
4	Robot's mathematical model	55
4.1	Introduction	55
4.2	Kinematics model	55
4.2.1	Representation by homogeneous transformation matrix	56
4.2.1.1	Denavit Hartenberg method (D-H)	57
4.2.1.2	"Danny walker" kinematics model	61
4.2.1.3	Kinematics simulator	69
4.3	Dynamic model	70
4.3.1	Inverted pendulum approach	70
4.3.2	Artificial neural network approach	72
4.3.2.1	System Identification	72
4.3.2.2	Neural Network model's performance	74
5	Robot's walking	81
5.1	Introduction	81
5.2	Static walk	82
5.3	Dynamic walk	82
5.4	Zero Moment Point (ZMP)	83
5.4.1	ZMP as a control criteria	85
5.5	Balance control	87
5.5.1	Incremental fuzzy PD algorithm	88
5.5.1.1	Fuzzyfication	89
5.5.1.2	Fuzzy rules	91
5.5.1.3	Defuzzyfication	92
5.6	Walking sequence control	93
5.6.1	Walking phases	94
5.6.2	Cubic polynomial interpolation algorithm	95
5.6.2.1	Cubic polynomial interpolation example	96

<i>CONTENTS</i>	11
5.6.2.2 Implementation	97
6 Measure of a biped's robot performance	103
6.1 Introduction	103
6.2 Balance control algorithm performance measure	103
6.3 Walking sequence algorithm performance	109
A Tools for the robot localization	115
A.1 Introduction	115
A.2 Position	115
A.3 Orientation	116
A.3.1 Rotation matrix	116
A.3.2 Rotation composition	120
A.4 Homogeneous transformation matrix [HTM]	121
A.4.1 Coordinates	121
A.4.2 Application	122
A.4.2.1 Translation	123
A.4.2.2 Rotation	125
A.4.2.3 Translation-rotation	127
A.4.3 Geometric meaning	130
A.4.4 Composition	132
A.4.4.1 Operations performed over OXYZ, fixed system	133
A.4.4.2 Operations performed over the <i>OUVW</i> , moving system	134
B Recursive Identification	137
B.1 Equation Formulation	137
B.2 Estimation Of Model Parameters	139
B.3 The Least Squares Estimator	141
B.3.1 Is the LSE biased?	141
B.3.2 How accurate is the LSE?	142
B.3.3 Conclusion (concerning the bias and accuracy of the LSE)	143
B.4 Improving The LSE	143
B.4.1 What is required to minimize LSE variance?	143
B.5 Conclusion	143
C A tool for Computer Vision	145
C.1 Introduction	145

C.2	Basic concepts of the images	146
C.2.1	Reading and writing images from a file	146
C.2.2	Access to pixel and planes in the images	149
C.2.3	Sub-sampling of images	152
C.2.4	Data type of the image elements	154
C.3	Image processing functions	154
C.3.1	Spatial filtering	154
C.3.2	Edge detection functions	157
C.3.3	Binary images and segmentation for threshold	158
C.3.4	Morphological operations	158
C.3.5	Object-Based Operations	160
C.3.6	Object Selection	164
C.3.7	Feature measurement	165
C.3.8	The conversion function of images and color models	167
C.4	The vfm tool	168
C.4.1	Image capture in MatLAB	170
D	Introduction to control system theory	171
D.1	Elements	171
D.2	Mathematical system representations	172
D.2.1	Differential equations	172
D.2.2	Space state representation	174
D.2.2.1	Nonlinear time-invariant continuous-time systems	174
D.2.2.2	Linear time-invariant system (LTI)	175
D.3	Implementation of the controller	175
D.3.1	For a time-invariant system	176
