|------------------------|------------------------------------------------------------------------------------------------------------------|------------|
| <b>Zusammenfassung</b> |                                                                                                                  | <b>7</b>   |
| <b>Summary</b>         |                                                                                                                  | <b>10</b>  |
| <b>Chapter 1</b>       | <b>Introduction</b>                                                                                              | <b>13</b>  |
|                        | Origin and taxonomy of South American camelids                                                                   | 15         |
|                        | Lactation in South American camelids                                                                             | 16         |
|                        | Estimation of milk intake                                                                                        | 20         |
|                        | Scope of the thesis                                                                                              | 26         |
|                        | References                                                                                                       | 27         |
| <b>Chapter 2</b>       | <b>Changes in llama (<i>Lama glama</i>) milk composition during lactation</b>                                    | <b>33</b>  |
| <b>Chapter 3</b>       | <b>Measurement of milk intake in suckling llamas (<i>Lama glama</i>) using deuterium oxide dilution</b>          | <b>55</b>  |
| <b>Chapter 4</b>       | <b>Body weight development and growth characteristics of the llama (<i>Lama glama</i>) from birth to weaning</b> | <b>77</b>  |
| <b>Chapter 5</b>       | <b>General discussion</b>                                                                                        | <b>91</b>  |
|                        | Introduction                                                                                                     | 93         |
|                        | Interspecies comparison of milk intake and milk output at peak lactation                                         | 93         |
|                        | Basic energy and protein recommendations for per-ruminant and lactating llamas                                   | 122        |
|                        | Conclusion                                                                                                       | 125        |
|                        | References                                                                                                       | 126        |
| <b>Appendix</b>        |                                                                                                                  | <b>131</b> |
