Table of Contents

Abstract.....	i
Table of Contents.....	ii
List of Figures.....	iv
List of Tables.....	vi
Abbreviations.....	viii
Chapter 1: Introduction.....	1
1.1 Urban Sanitation.....	1
1.2 The Role of Sanitation in Sustainable Development.....	3
1.3 Goal Seven and the Urban Poor.....	4
1.4 Conventional Sanitation vs. Sustainable Sanitation.....	5
1.5 Meeting the Sanitation Target.....	6
1.6 The case of Abuja, Nigeria.....	7
1.7 Outline of the Report.....	8
Chapter 2: Review of Research Issues.....	9
2.1 The Importance of Sanitation.....	9
2.1.1 Sanitation and Diseases.....	11
2.2 Approaches in Sanitation.....	13
2.2.1 Conventional Approach to Sanitation.....	14
2.2.2 Sanitation in Developing Countries.....	18
2.2.3 Alternative Approaches to Sanitation.....	19
2.2.4 Ecological Sanitation.....	19
2.2.4.1 Methods in EcoSan.....	20
2.2.4.2 Potential Benefits of EcoSan.....	22
2.2.4.3 Challenges of Ecological Sanitation and Possible Responses.....	23
2.2.5 ‘Low cost conventional’ Sanitation.....	23
2.3 Sanitation Technologies.....	24
2.3.1 Toilet Fixtures and Devices.....	24
2.3.2 Technologies for Collection/Storage.....	27
2.3.3 Technologies for Transport.....	31
2.3.4 Treatment Technologies.....	34
2.3.5 Systems for Disposal/Reuse.....	42
2.4 Nigeria.....	44
2.4.1 Status of Water Supply and Sanitation in Nigeria.....	47
2.4.1.1 Water Supply.....	47
2.4.1.2 Sanitation in Nigeria.....	48
2.4.1.3 Environmental Management in Nigeria.....	49
2.4.1.4 Water and Sanitation Policy in Nigeria.....	49
2.4.1.5 Problems facing the Water Sector in Nigeria.....	50
2.5 Abuja: Creation and Development.....	51
2.5.1 Physical Development.....	52
2.5.2 The Development of Squatter Settlements in the FCT.....	53
Chapter 3: Purpose of the Study.....	58
3.1 Background.....	58
3.2 Scope of Study.....	58
3.3 Aims and Objectives of the study.....	58
3.4 Limitations of the Study.....	59

Chapter 4: Research Methods.....	60
4.1 Overview of the Methods.....	60
4.2 Methods for the Field Study.....	60
4.2.1 Collection of Secondary and Primary Data.....	61
4.2.1.1 Site Visits.....	61
4.2.1.2 Interviews.....	61
4.2.1.3 Survey.....	62
4.2.2 Sampling of Respondents.....	63
4.2.3 Data Analysis.....	63
4.3 Technology Selection.....	64
4.4 Scenario Development.....	65
4.5 Design Calculations.....	67
4.5.1 Simplified Sewerage Design.....	67
4.5.2 Waste Stabilisation Pond Design.....	69
4.5.2.1 Anaerobic Pond Design.....	69
4.5.2.2 Facultative Pond Design.....	70
4.5.2.3 Maturation Pond Design.....	70
4.5.3 Small Onsite Constructed Wetlands.....	71
4.5.4 Settled Sewerage and Interceptor Tank Design.....	72
4.5.4.1 Interceptor Tank Design.....	72
4.5.4.2 Settled Sewerage Design.....	73
4.5.5 Double Vault Systems.....	75
4.5.6 Urine Collection Tanks.....	75
4.6 Scenario Comparison.....	75
4.6.1 Cost Analysis.....	75
4.6.2 Overall Scenario Comparison.....	76
 Chapter 5: Results of the Field Study.....	 77
5.1 Profile of Abuja.....	77
5.1.1 Location.....	77
5.1.2 Administrative Boundaries.....	77
5.1.3 Geophysical Characteristics.....	78
5.1.4 Socio-economic Characteristics.....	81
5.1.5 Water Supply Infrastructure in the FCC.....	82
5.1.5.1 Challenges of Water Supply in the FCC.....	85
5.1.5.2 Recommended Improvement Measures.....	87
5.1.6 Wastewater Management.....	89
5.1.6.1 Challenges of Wastewater Management in the FCT.....	94
5.1.6.2 Recommended Improvement Measures.....	96
5.1.7 Solid Waste.....	101
5.1.7.1 Challenges of Solid Waste Management in the FCT.....	104
5.2 The Peri-Urban Study Settlements.....	104
5.2.1 Description of the Settlements.....	104
5.2.2 Factors Affecting the Location and Development of the Slums.....	107
5.3 Survey in the Peri Urban Settlements.....	109
5.3.1 General Findings of the Survey.....	109
5.3.2 Water Supply.....	112
5.3.3 Sanitation Facilities.....	115
5.3.4 Preferences and Satisfaction.....	118
5.3.5 Reuse of Treated Excreta in Agriculture.....	121

5.3.6	Sanitation Related Health Issues.....	126
5.3.7	Solid Waste in the Peri-urban Settlements	128
5.3.8	Limitations of the Study.....	131
5.4	Analysis of Existing Sanitation Systems in the Study Areas.....	133
5.4.1	Conventional Waterless Sanitation.....	133
5.4.2	Conventional Waterborne Sanitation.....	136
5.5	Addressing the Need for Sanitation Services in the FCT	139
Chapter 6:	Proposed Sanitation Scenarios.....	142
6.1	The Design Area	142
6.2	Sanitation Systems	142
6.2	Semi-Central or Decentralised Systems.....	143
6.2.1	Combined Sewage Collection with Offsite Treatment	143
6.2.1.2	Wet Sanitation with Separation of Solids	148
6.2.1.3	Separation at Source and Onsite/Offsite Treatment	153
6.2.2	Onsite Systems	156
6.2.2.1	Dry System with Urine Diversion.....	156
6.2.2.2	Wet System with Separation.....	161
6.3	Cost Estimation and Analysis	164
6.3.1	Cost Estimation.....	164
6.3.2	Cost Analysis and Comparison.....	167
Chapter 7:	Conclusions and Recommendations.....	172
References.....		176
APPENDICES.....		182
A:	Survey Tool and Description of Study Methods	183
B:	Scenario Design and Cost Estimates	190
C:	Net Present Value for the Scenarios	211
D:	Solid Waste Tarriffs for the FCC	216

List of Figures

Figure 2. 1:	Faeco-oral transmission routes	12
Figure 2. 2:	The ‘do nothing’ approach – open defecation.	14
Figure 2. 3:	a) ‘flush and discharge’ and b) ‘drop and store’ approaches	15
Figure 2. 4:	Constituents of domestic wastewater	16
Figure 2. 5:	a) Conventional wastewater systems and b) 'Ecological sanitation' systems	20
Figure 2. 6:	Wastewater streams, treatment and reuse possibilities	22
Figure 2. 7:	SanPlat squat plate.....	24
Figure 2. 8:	Pour flush pan.....	25
Figure 2. 9:	UD squat pan (a) and pedestal (b).....	25
Figure 2. 10:	Vacuum toilet.....	26
Figure 2. 11:	VIP toilet.....	28
Figure 2. 12:	Double vault composting toilet.....	28
Figure 2. 13:	Section view of a septic tank.....	29
Figure 2. 14:	Rottebehaelter - (a) with filter bed and (b) with filter sack.....	30
Figure 2. 15:	(a) manual and (b) truck emptying devices.....	31
Figure 2. 16:	Scheme of conventional and simplified sewerage system.....	32
Figure 2. 17:	Scheme of the settled sewerage system.....	33
Figure 2. 18:	Scheme of the vacuum sewerage system.....	34

Figure 2. 19:	Free Water Surface (FWS) Wetland.....	35
Figure 2. 20:	Subsurface Flow (SF) Wetland.....	35
Figure 2. 21:	Examples of Double Vault Dehydration Systems	42
Figure 2. 22:	Countries expected to experience water stress or scarcity in 2025.....	43
Figure 2. 23:	Maps of Nigeria, FCT and FCC phases 1, 2, 3.....	51
Figure 2. 24:	Progression of resettlement policy for the FCT.....	55
Figure 2. 25:	Causes of squatter settlement development.....	56
Figure 4. 1:	Some squatter settlements in the FCC.....	63
Figure 4. 2:	Flowchart of scenario development process.....	66
Figure 5. 1:	Map showing area councils of the FCT of Nigeria and the location of the FCC.....	78
Figure 5. 2:	Population distribution for some Area Councils in the FCT.....	81
Figure 5. 3:	Water vendors collecting water for sale.....	87
Figure 5. 4:	Illegal pipe connections to water mains.....	87
Figure 5. 5:	Losses due to pipe damage from illegal connections	87
Figure 5. 6:	Wastewater discharge from the Security Printing facility in Abuja	89
Figure 5. 7:	Scheme of the Wupa Wastewater Treatment Plant	91
Figure 5. 8:	The Wuye Wastewater Treatment Plant in disuse, at Wuye FCC, Abuja.	92
Figure 5. 9:	The Lungi Wastewater Treatment Plant FCC, Abuja.	93
Figure 5. 10:	Bleeding manholes due to blockage in parts of the FCC.....	95
Figure 5. 11:	Wastewater discharge point into Wuye River; (b) Swimmer in the Wuye River.....	97
Figure 5. 12:	Waste dump at Kuchigoro.....	102
Figure 5. 13:	Waste dump sites at Mpape Junction; (b) scavengers at the site	102
Figure 5. 14:	Landfill site turned waste dumpsite and Ajata Landfill Site.	103
Figure 5. 15:	Composting Plant at Ajata overgrown with weeds.....	103
Figure 5. 16:	Scavenger rummaging through a bin in the FCC.....	104
Figure 5. 17:	Some houses in the study settlements.....	105
Figure 5. 18:	Roads in Kuchigoro – typifying roads in the most of settlements.....	106
Figure 5. 19:	Number of respondents for each of the selected peri-urban areas.	110
Figure 5. 20:	Responses on home ownership in the selected peri-urban areas.....	110
Figure 5. 21:	Shared pour flush toilet in poor condition in Chika.....	111
Figure 5. 22:	Water sources in the selected peri-urban areas.....	112
Figure 5. 23:	Responses on perception of water quality in the selected peri-urban areas.	113
Figure 5. 24:	Responses on satisfaction with water supply in the selected peri-urban areas.....	114
Figure 5. 25:	An unprotected water source.....	114
Figure 5. 26:	People collecting water from the same unprotected source.....	114
Figure 5. 27:	People collecting water.....	115
Figure 5. 28:	The open defecation site close to the water source	115
Figure 5. 29:	Responses on questions on access to sanitation facility in the selected peri-urban areas.	116
Figure 5. 30:	Responses on types of sanitary facilities in the selected peri-urban areas.	116
Figure 5. 31:	Responses on the location of toilets in the selected peri-urban areas....	117
Figure 5. 32:	Responses on toilet use in the selected peri-urban areas.	117
Figure 5. 33:	Responses on choice of cleaning material from residents of the selected peri-urban areas.	118

Figure 5. 34:	Responses on preferences regarding position when using the toilet.	118
Figure 5. 35:	Responses on importance of privacy to respondents.....	119
Figure 5. 36:	Responses on preferences regarding location of sanitation facility.....	120
Figure 5. 37:	Responses about satisfaction with existing sanitation facilities in the selected peri-urban areas.....	120
Figure 5. 38:	Responses on knowledge about the use of fertilising agents in agriculture	121
Figure 5. 39:	Responses on knowledge of the use of animal manure in agriculture... ..	122
Figure 5. 40:	Responses to questions on knowledge of the use of human waste in agriculture.....	122
Figure 5. 41:	Responses on acceptance of the use of human waste in agriculture.....	123
Figure 5. 42:	Responses on acceptance of food grown using human waste	124
Figure 5. 43:	(a & b) Farmer irrigating his crops with wastewater from the Wuye plant discharge point; (c) maize plants; (d) scotch bonnet peppers; (e) local spinach plant.....	125
Figure 5. 44:	Responses on attitudes to handling human waste in the selected peri-urban areas	126
Figure 5. 45:	Responses on knowledge about the importance of hand washing as a measure of hygiene and disease prevention in the selected peri-urban areas.	128
Figure 5. 46:	Responses on solid waste service providers in the selected peri-urban areas	128
Figure 5. 47:	Responses to various questions on solid waste management	129
Figure 5. 48:	Responses on willingness to pay for services in the selected peri-urban areas	130
Figure 5. 49:	Responses on preferences regarding service providers	131
Figure 5. 50:	Superstructure of a pit latrine in Karmo	135
Figure 5. 51:	Inside a pit latrine in Karmo.....	135
Figure 6. 1:	Maps of the (a) design area; (b) Sector 4 of Kuje, FCT	142
Figure 6. 2:	Semi-centralised sanitation with waterborne sewage collection and offsite treatment	143
Figure 6. 3:	O&M jurisdiction of property owner and sewer authority.....	145
Figure 6. 4:	Decentralised system with low flush toilet, separation, composting, and wetland treatment	149
Figure 6. 5:	Decentralised sanitation scenario with source separation and urine diversion.....	154
Figure 6. 6:	Onsite dry sanitation scenario with urine diversion	157
Figure 6. 7:	Onsite sanitation scenario with low flush toilet and onsite treatment..	161

List of Tables

Table 2. 1:	Environmental classification of excreta-related diseases	11
Table 2. 2:	Guidelines for the microbiological quality of wastewaters used for crop irrigation	43
Table 2. 3:	Population projections for selected countries	46
Table 2. 4:	Nigeria – population density, rural and urban population for years 2005-2030.....	46
Table 2. 5:	Water sources in Nigeria.....	47
Table 2. 6:	Types of sanitation facilities in Nigeria.....	49
Table 2. 7:	Water consumption estimates in Nigeria	50

Table 2. 8:	List of some Squatter Settlements in the FCT.....	55
Table 4. 1:	Overview of the research methodology	60
Table 4. 2:	Summary of data collection methods	64
Table 4. 3:	Summary of technologies and design methods	67
Table 5. 1:	Average monthly rainfall (mm) for the FCT	79
Table 5. 2:	Average monthly temperature for the FCT	79
Table 5. 3:	Monthly averages of relative humidity data for the FCT.....	80
Table 5. 4:	Characteristics of soils within the FCT.....	80
Table 5. 5:	Population profile of the FCT	81
Table 5. 6:	Organisation structure of the FCT Water Board	82
Table 5. 7:	Water storage tanks and the area served.	83
Table 5. 8:	Common sources of water in the FCT.....	84
Table 5. 9:	Influent characteristics for Wuye Treatment Facility	90
Table 5. 10:	Wastewater treatment facilities in the FCC.....	90
Table 5. 11:	Number of residents per household	111
Table 5. 12:	Average water consumption per day and cost of water in the selected peri-urban areas	113
Table 5. 13:	Infant and Under 5 mortality rates for Nigeria	126
Table 5. 14:	The most significant diseases in the FCT.....	127
Table 5. 15:	Reported cases of water and excreta related diseases and fatalities.....	127
Table 5. 16:	Summary of sanitation technologies and treatment available in the study area.....	138
Table 5. 17:	List of potentially feasible sanitation technologies	141
Table 6. 1:	Costs for entire design area and population for scenario presented in 6.2.1.1	164
Table 6. 2:	Costs for entire design area and population for scenario presented in 6.2.1.2	165
Table 6. 3:	Costs per household with onsite management for scenario presented in 6.2.1.3.....	165
Table 6. 4:	Costs per household with centralised management for scenario presented in 6.2.1.3	166
Table 6. 5:	Costs per household for scenario presented in 6.2.2.1.....	166
Table 6. 6:	Costs per household with onsite management for scenario presented in 6.2.2.2.....	167
Table 6. 7:	Scenarios and their respective references	167
Table 6. 8:	NPV for the proposed scenarios	168
Table 6. 9:	Qualitative comparison of the proposed scenarios	169
