

## TABLE OF CONTENTS

1	INTRODUCTION.....	1
1.1	Background and problem statement.....	1
1.2	Objectives .....	3
2	WILD <i>COFFEA ARABICA</i> IN SOUTHWESTERN ETHIOPIA .....	4
2.1	Ecological requirements of <i>Coffea arabica</i> .....	4
2.2	Traditional management and processing practices .....	5
2.3	History of coffee production and trade in Kafa .....	6
3	BIODIVERSITY AND ITS CONSERVATION .....	10
3.1	Biodiversity assessment.....	10
3.2	Disturbance and tropical rainforest biodiversity.....	11
3.2.1	Definition of disturbance.....	11
3.2.2	Gap dynamics .....	12
3.2.3	Fragmentation.....	14
3.3	Conservation of biodiversity.....	15
3.4	Biosphere reserves: a comprehensive conservation framework .....	18
4	STUDY AREA AND SAMPLING DESIGN .....	20
4.1	Study area.....	20
4.1.1	Geographic location and topography .....	20
4.1.2	Geology and soils .....	21
4.1.3	Climate .....	21
4.1.4	Forest vegetation .....	23
4.1.5	Human population .....	24
4.1.6	Land-use types and land tenure.....	25
4.2	Sampling design.....	26
4.2.1	Location of plots.....	26
4.2.2	Vegetation survey.....	27
4.2.3	Site factors.....	28
5	WILD COFFEE PRODUCTION SYSTEMS AND WILD COFFEE ECOLOGY .....	30
5.1	Introduction.....	30
5.2	Material and methods.....	31
5.2.1	Data set .....	31
5.2.2	Survey of coffee populations.....	31
5.2.3	Data analysis .....	32
5.3	Results and discussion .....	32
5.3.1	Soil and environmental properties.....	32
5.3.2	Levels of forest disturbance .....	34
5.3.3	Characterization of wild coffee management systems .....	39
5.3.4	Estimation of coffee yields.....	47
5.3.5	Growth and regeneration of coffee.....	49
5.3.6	Environmental versus management impacts on coffee .....	57
5.4	Definition of wild coffee and implications for conservation .....	62

6	PLANT DIVERSITY AND IMPACT OF WILD COFFEE MANAGEMENT ...	65
6.1	Introduction.....	65
6.2	Material and methods.....	66
6.2.1	Data set .....	66
6.2.2	Ordination methods .....	66
6.2.3	Analysis of species composition .....	68
6.2.4	Analysis of species diversity .....	69
6.3	Results and discussion .....	69
6.3.1	Overall species richness .....	69
6.3.2	Ubiquitous species.....	70
6.3.3	Species diversity distribution .....	73
6.3.4	General remarks on species composition and environmental factors .....	83
6.3.5	Ground layer composition.....	86
6.3.6	Epiphyte composition.....	91
6.3.7	Composition of woody plants and climbers (1): impact of altitude.....	94
6.3.8	Composition of woody plants and climbers (2): management impact..	100
6.4	Implications for conservation .....	109
7	ABUNDANCE AND DISTRIBUTION OF CANOPY TREE SPECIES .....	113
7.1	Introduction.....	113
7.2	Material and methods.....	114
7.2.1	Data set .....	114
7.2.2	Survey of tree species.....	114
7.2.3	Data analysis .....	114
7.3	Results and discussion .....	115
7.3.1	Definition of rarity for tree species in the Bonga region.....	115
7.3.2	Rare species.....	118
7.3.3	Occasional species.....	120
7.3.4	Common species .....	125
7.4	Implications for conservation .....	129
7.4.1	Impact of human disturbance .....	129
7.4.2	Preventive measures .....	131
8	CONSERVATION PLANNING FOR THE BONGA REGION.....	133
8.1	Introduction.....	133
8.2	Proposal for a biosphere reserve in the Bonga region .....	134
8.2.1	Objectives.....	134
8.2.2	Benefits and incentives.....	136
8.2.3	Management guidelines.....	137
8.2.4	Core area .....	139
8.2.5	Buffer zone .....	141
8.2.6	Transition area.....	144
9	CONCLUSIONS .....	146
10	REFERENCES .....	148
11	APPENDICES .....	161

ACKNOWLEDGEMENTS
