TABLE OF CONTENTS

1	GENERAL INTRODUCTION.....	1
1.1	<i>Coffea arabica</i> as an economic plant in Ethiopia and beyond.....	1
1.2	Distribution and diversity of coffee forests in Ethiopia.....	3
1.2.1	Distribution of forest with wild <i>Coffea arabica</i>	3
1.2.2	Spread of coffee from Ethiopia.....	4
1.3	Evolution and origin of <i>C. arabica</i>	6
1.3.1	Hybridization and allopolyploid species evolution.....	6
1.3.2	Origin of <i>C. arabica</i>	7
1.4	Analyses of genetic diversity within species.....	8
1.4.1	Information from morphological characters.....	9
1.4.2	Information from biochemical data.....	9
1.4.3	Information from molecular markers.....	10
1.5	The gene pool of wild <i>C. arabica</i> in Ethiopia.....	12
1.6	Importance of genetic diversity analyses for genetic resource management.....	14
1.7	The CoCE project (Conservation and use of wild populations of <i>Coffea arabica</i> in the montane rainforests of Ethiopia).....	15
1.8	Aims and scope of this study.....	17
2	EVOLUTION OF <i>COFFEA</i> CHLOROPLAST MICROSATELLITES AND EVIDENCE FOR THE RECENT DIVERGENCE OF <i>C. ARABICA</i> AND <i>C. EUGENIOIDES</i> CP GENOMES.....	19
2.1	Introduction.....	19
2.2	Materials and Methods.....	22
2.2.1	Plant material and sampling.....	22
2.2.2	DNA isolation.....	22
2.2.3	Selection of genomic regions and primer design.....	23
2.2.4	Amplification and sequencing of cp genomic regions.....	24
2.2.5	Alignment.....	26
2.2.6	Coding of indels.....	26
2.2.7	Analysis of microsatellites.....	26
2.2.8	Phylogenetic inference.....	27
2.2.9	Reconstruction of character evolution.....	27
2.3	Results.....	28
2.3.1	Chloroplast DNA sequence datasets.....	28
2.3.2	Chloroplast microsatellites in <i>Coffea</i>	28
2.3.3	Sequence characteristics of individual regions.....	31
2.3.4	Phylogenetic Inference.....	35
2.4	Discussion.....	38
2.4.1	Structure and evolution of chloroplast microsatellites.....	38
2.4.2	Molecular evolution of different partitions.....	42
2.4.3	Relationships of <i>Coffea</i> and origin of <i>C. arabica</i>	45
2.4.4	<i>Coffea arabica</i> exhibits a single cp haplotype.....	46
2.5	Conclusions and future directions.....	47

3	GENETIC DIVERSITY OF <i>COFFEA ARABICA</i> THROUGHOUT ITS NATIVE RANGE IN ETHIOPIA BASED ON ISSR FINGERPRINT DATA.....	49
3.1	Introduction	49
3.2	Materials and Methods	53
3.2.1	Sampling strategy and populations studied.....	53
3.2.2	Plant materials and DNA extraction	54
3.2.3	Primer selection and PCR conditions	57
3.2.4	Data analysis	57
3.3	Results	58
3.3.1	Genetic diversity	58
3.3.2	Cluster analysis	62
3.3.3	Principal coordinate analysis (PCO).....	65
3.3.4	Genetic differentiation at different levels in space	65
3.3.5	Abiotical factors and genetic diversity	69
3.4	Discussion.....	70
3.4.1	Utility of ISSR markers in <i>Coffea</i>	70
3.4.2	Support for wild <i>C. arabica</i> as distinct from semi-domesticated plants	70
3.4.3	Relationships among wild <i>C. arabica</i> populations in Ethiopia	73
3.4.4	Patterns of genetic diversity in wild <i>C. arabica</i>	76
3.4.5	Differences in levels of genetic diversity among different plots	80
3.5	Conclusions	82
4	INTRAREGIONAL GENETIC DIVERSITY AND POPULATION STRUCTURE OF WILD <i>C. ARABICA</i> FROM BERHANE KONTIR AND YAYU (GEBBA DOGI).....	83
4.1	Introduction	83
4.2	Materials and Methods	87
4.2.1	Study population and plant materials.....	87
4.2.2	DNA isolation	88
4.2.3	ISSR-PCR amplification.....	90
4.2.4	Data analysis	91
4.3	Results	93
4.3.1	Genetic diversity	93
4.3.2	Partitioning genetic diversity and population structure	95
4.3.3	Cluster analysis	96
4.3.4	Principal coordinate analysis (PCO).....	102
4.4	Discussion.....	105
4.4.1	Intraregional diversity	105
4.4.2	Fine-scale spatial genetic structuring.....	109
4.5	Conclusions	113

5	CONCLUSIONS AND RECOMMENDATIONS	114
5.1	Introduction	114
5.2	Conclusions for conservation and sustainable use of wild <i>C. arabica</i> based on the results of this study	114
5.2.1	Evidence for true wild coffee.....	114
5.2.2	Multi-site in situ conservation approach.....	115
5.2.3	Gene flow and genetic diversity	115
5.2.4	Utilization in breeding program.....	116
5.2.5	ISSR markers and its implications.....	116
5.2.6	Utility of chloroplast regions	117
5.3	Further conclusions and recommendations	117
5.4	Future research needs	117
6	REFERENCES.....	119
