TABLE OF CONTENTS

1 GENERAL INTRODUCTION 1

1.1 Background and problem statement 1
1.2 Hypothesis of the study 4
1.3 Scope and objective of the study 4
1.4 Thesis structure 5

2 STATE-OF-THE-ART 6

2.1 Morphological and physiological features of Arabica coffee 6
2.1.1 Morphology of Arabica coffee 6
2.1.2 Physiology of Arabica coffee 8
2.2 Ecological requirements of coffee 9
2.2.1 Temperature 10
2.2.2 Water 10
2.2.3 Light and wind 12
2.2.4 Soil factors 13
2.3 Plant-water relations 14
2.3.1 Plant response to drought stress 16
2.3.2 Soil moisture and transpiration 18
2.3.3 Photosynthesis and water-use efficiency 22
2.3.4 Biomass assimilation and partitioning 23
2.3.5 Hydraulic characteristics 25

3 THE STUDY AREA AND METHODOLOGY 28

3.1 Study area 28
3.1.1 Field study 28
3.1.2 Nursery study 33
3.2 Methodology 34
3.2.1 Field experiment 34
3.2.2 Nursery experiment 36
3.2.3 Soil analysis 37
3.2.4 Data analysis 38
3.3 Ecology of the study montane rainforests 38
3.3.1 Climate 38
3.3.2 Plant association 39
3.3.3 Soil 42
3.3.4 Discussion 50

4 GROWTH ARCHICTURE OF THE WILD ARABICA COFFEE TREES 55

4.1 Introduction 55
4.2 Material and methods 57
4.3 Statistical analysis 59
4.4 Results 59
4.4.1 Shoot characteristics 59
4.4.2 Leaf characteristics 65

4.4.3 Yield and yield components 67
4.4.4 Branch growth 71
4.4.5 Root growth 73
4.4.6 Growth rate of wild coffee trees 79
4.5 Discussion 80

5 WATER RELATIONS AND HYDRAULIC CHARACTERISTICS OF THE WILD COFFEE TREES 86

5.1 Introduction 86
5.2 Material and methods 88
5.2.1 Soil-plant moisture contents 88
5.2.2 Hydraulic measurements 89
5.3 Statistical analysis 91
5.4 Results 91
5.4.1 Soil moisture 91
5.4.2 Leaf water content 93
5.4.3 Hydraulic conductance 95
5.4.4 Relations between growth and hydraulic parameters 101
5.4.5 Hydraulic resistance 104
5.5 Discussion 108

6 GROWTH AND DEVELOPMENT OF COFFEE SEEDLINGS 114

6.1 Introduction 114
6.2 Material and methods 117
6.2.1 Microclimatic measurements 117
6.2.2 Phenological parameters 118
6.2.3 Leaf and branch orientations 118
6.2.4 Leaf chlorophyll contents 119
6.2.5 Shoot and root morphology 119
6.2.6 Response to light regimes 120
6.3 Statistical analysis 121
6.4 Results 122
6.4.1 Characteristics of potting medium 122
6.4.2 Microclimatic variables 122
6.4.3 Seedling emergence and early growth 124
6.4.4 Growth characteristics of coffee seedlings 129
6.4.5 Biomass production and partitioning 145
6.4.6 Growth rate of coffee seedlings 153
6.4.7 Growth response to light regimes 159
6.5 Discussion 167
6.5.1 Microclimate 167
6.5.2 Growth characteristics of coffee seedlings 168
6.5.3 Biomass assimilation and distribution 173
6.5.4 Growth rate of coffee seedlings 175
6.5.5 Growth response to light regime 177

7 WATER RELATIONS AND HYDRAULIC CHARACTERISTICS OF COFFEE SEEDLINGS 183
7.1 Introduction 183
7.2 Material and methods 186
7.2.1 Determination of moisture content 186
7.2.2 Percent loss of hydraulic conductance 187
7.2.3 Recovery from drought stress 187
7.2.4 Soil-plant chemical compositions 189
7.2.5 Hydraulic measurements 189
7.2.6 Stomatal characteristics 191
7.3 Statistical analysis 192
7.4 Results 192
7.4.1 Soil moisture content 192
7.4.2 Leaf water potential 194
7.4.3 Relative leaf water content 200
7.4.4 Percent loss of conductance 203
7.4.5 Recovery from drought stress 206
7.4.6 Soil-plant chemical compositions 217
7.4.7 Hydraulic measurements 227
7.4.8 Stomatal characteristics 246
7.5 Discussion 253
7.5.1 Soil-plant water relations 253
7.5.2 Soil-plant chemical compositions 262
7.5.3 Hydraulic resistance 263
7.5.4 Hydraulic conductivity 267
7.5.5 Stomatal characteristics 271

8 OVERALL SUMMARY 276

9 GENERAL CONCLUSIONS AND RECOMMENDATIONS 280
9.1 Conclusions 280
9.2 Recommendations 282
