| <b>Abstract</b>   | <b>v</b>   |
| <b>Sommario</b>   | <b>vii</b> |
| <b>1 Introduction</b>   | <b>1</b>   |
| 1.1 Optimal Analgesics Administration . . . . .                       | 2          |
| 1.2 Optimal Analgesics Administration in Postoperative Care . . . . . | 3          |
| 1.3 Optimal Analgesics Administration in Conscious Sedation . . . . . | 4          |
| 1.4 Optimal Analgesics Administration in General Anesthesia . . . . . | 6          |
| <b>2 Background</b>   | <b>9</b>   |
| 2.1 Introduction . . . . .  | 10         |
| 2.2 Drug Disposition and Action . . . . .                             | 10         |
| 2.3 Modelling Drug Disposition and Action . . . . .                   | 12         |
| 2.3.1 Pharmacokinetic Modelling . . . . .                             | 12         |
| 2.3.2 Pharmacodynamic Modelling . . . . .                             | 18         |
| <b>3 Optimal Analgesics Administration during Postoperative Care</b>  | <b>21</b>  |
| 3.1 Introduction . . . . .  | 22         |
| 3.1.1 Postoperative Care . . . . .                                    | 22         |
| 3.1.2 Problem Formulation . . . . .                                   | 22         |
| 3.1.3 Aim of the Work . . . . .                                       | 23         |
| 3.2 The Black-box Optimization Procedure . . . . .                    | 25         |

|          |  |           |
|----------|--|-----------|
| 3.2.1    | The Simplex Method . . . . .                                       | 26        |
| 3.2.2    | The Partition Method . . . . .                                     | 28        |
| 3.2.3    | The Novel Optimization Procedure . . . . .                         | 30        |
| 3.3      | The Black-box Optimization Procedure in Practice . . . . .         | 35        |
| 3.3.1    | The Clinical Study . . . . .                                       | 35        |
| 3.3.2    | The Results . . . . .  | 39        |
| 3.4      | The Well-being Model . . . . .                                     | 42        |
| 3.4.1    | Model Derivation . . . . .   | 43        |
| 3.4.2    | Model Analysis . . . . .   | 54        |
| 3.4.3    | The Optimal Administration . . . . .                               | 61        |
| 3.5      | The Well-being Model in Practice . . . . .                         | 63        |
| 3.5.1    | Estimation of PD and Link Model Parameters . . . . .               | 64        |
| 3.5.2    | Estimation of Interaction Parameters . . . . .                     | 65        |
| 3.5.3    | The Optimal Administration . . . . .                               | 70        |
| <b>4</b> | <b>Optimal Analgesics Administration during Conscious Sedation</b> | <b>73</b> |
| 4.1      | Introduction . . . . .   | 74        |
| 4.1.1    | Conscious Sedation . . . . .                                       | 74        |
| 4.1.2    | Problem Formulation . . . . .                                      | 75        |
| 4.1.3    | Aim of the work . . . . .  | 76        |
| 4.2      | State of the Art Modelling . . . . .                               | 78        |
| 4.2.1    | Gas Exchange System . . . . .                                      | 81        |
| 4.2.2    | Cardiovascular Regulation . . . . .                                | 84        |
| 4.2.3    | Ventilatory Regulation . . . . .                                   | 86        |
| 4.2.4    | Opioid Effect on Ventilation . . . . .                             | 90        |
| 4.3      | Model Analysis . . . . .   | 93        |
| 4.3.1    | Model Response to $O_2$ and $CO_2$ Conditions . . . . .            | 94        |
| 4.3.2    | Parameter Identifiability . . . . .                                | 100       |
| 4.4      | The New Model . . . . .  | 101       |
| 4.4.1    | New Model Response to Hyperoxia . . . . .                          | 101       |
| 4.4.2    | New Drug Action Modelling . . . . .                                | 103       |
| 4.5      | Controller Design and Validation . . . . .                         | 111       |
| 4.5.1    | The Patient Simulator . . . . .                                    | 112       |
| 4.5.2    | The Controller . . . . .   | 113       |
| 4.5.3    | Modelling Disturbances . . . . .                                   | 114       |
| 4.5.4    | Test of the Controller . . . . .                                   | 116       |

| <b>5 Optimal Analgesics Administration during General Anesthesia</b> | <b>119</b> |
| 5.1 Introduction . . . . .   | 120        |
| 5.1.1 General Anesthesia . . . . .                                   | 120        |
| 5.1.2 Problem Formulation . . . . .                                  | 120        |
| 5.1.3 Aim of the Work . . . . .                                      | 122        |
| 5.1.4 The Volunteer Study . . . . .                                  | 123        |
| 5.2 Stress-Induced MAP Variations . . . . .                          | 126        |
| 5.2.1 MAP and the Stress Response . . . . .                          | 126        |
| 5.2.2 Aim of the Work . . . . .                                      | 127        |
| 5.2.3 Model Identification . . . . .                                 | 130        |
| 5.2.4 Results and Discussion . . . . .                               | 132        |
| 5.3 Stress-Induced PWA Variations . . . . .                          | 135        |
| 5.3.1 PWA and the Stress Response . . . . .                          | 135        |
| 5.3.2 Aim of the Work . . . . .                                      | 136        |
| 5.3.3 Preliminary Analysis . . . . .                                 | 138        |
| 5.3.4 Analysis of Variance . . . . .                                 | 142        |
| 5.3.5 Results and Discussion . . . . .                               | 143        |
| 5.4 Principal Stress-induced Variations . . . . .                    | 145        |
| 5.4.1 Aim of the Work . . . . .                                      | 145        |
| 5.4.2 Principal Component Analysis . . . . .                         | 146        |
| 5.4.3 Results and Discussion . . . . .                               | 148        |
| <b>6 Main Achievements and Outlook</b>                               | <b>153</b> |
| 6.1 Optimal Analgesics Administration in Postoperative Care . .      | 154        |
| 6.2 Optimal Analgesics Administration in Conscious Sedation . .      | 155        |
| 6.3 Optimal Analgesics Administration in General Anesthesia .        | 157        |
