Abstract	v
Summary	vii
1 Introduction	1
1.1 Optimal Analgesics Administration	2
1.2 Optimal Analgesics Administration in Postoperative Care	3
1.3 Optimal Analgesics Administration in Conscious Sedation	4
1.4 Optimal Analgesics Administration in General Anesthesia	6
2 Background	9
2.1 Introduction	10
2.2 Drug Disposition and Action	10
2.3 Modelling Drug Disposition and Action	12
2.3.1 Pharmacokinetic Modelling	12
2.3.2 Pharmacodynamic Modelling	18
3 Optimal Analgesics Administration during Postoperative Care	21
3.1 Introduction	22
3.1.1 Postoperative Care	22
3.1.2 Problem Formulation	22
3.1.3 Aim of the Work	23
3.2 The Black-box Optimization Procedure	25

26	3.2.1	The Simplex Method
28	3.2.2	The Partition Method
30	3.2.3	The Novel Optimization Procedure
35	3.3	The Black-box Optimization Procedure in Practice
35	3.3.1	The Clinical Study
39	3.3.2	The Results
42	3.4	The Well-being Model
43	3.4.1	Model Derivation
54	3.4.2	Model Analysis
61	3.4.3	The Optimal Administration
63	3.5	The Well-being Model in Practice
64	3.5.1	Estimation of PD and Link Model Parameters
65	3.5.2	Estimation of Interaction Parameters
70	3.5.3	The Optimal Administration
74	4.1	Introduction
74	4.1.1	Conscious Sedation
75	4.1.2	Problem Formulation
76	4.1.3	Aim of the work
78	4.2	State of the Art Modelling
80	4.2.1	Gas Exchange System
84	4.2.2	Cardiovascular Regulation
86	4.2.3	Ventilatory Regulation
90	4.2.4	Opioid Effect on Ventilation
93	4.3	Model Analysis
94	4.3.1	Model Response to O_2 and CO_2 Conditions
100	4.3.2	Parameter Identifiability
101	4.4	The New Model
101	4.4.1	New Model Response to Hypoxia
103	4.4.2	New Drug Action Modelling
111	4.5	Controller Design and Validation
112	4.5.1	The Patient Simulator
113	4.5.2	The Controller
114	4.5.3	Modelling Disturbances
116	4.5.4	Test of the Controller
73	4	Optimal Analgesics Administration during Conscious Sedation

5	Optimal Analgesics Administration during General Anesthesia	119
5.1	Introduction	120
5.1.1	General Anesthesia	120
5.1.2	Problem Formulation	120
5.1.3	Aim of the Work	122
5.1.4	The Volunteer Study	123
5.2	Stress-Induced MAP Variations	126
5.2.1	MAP and the Stress Response	126
5.2.2	Aim of the Work	127
5.2.3	Model Identification	130
5.2.4	Results and Discussion	132
5.3	Stress-Induced PWA Variations	135
5.3.1	PWA and the Stress Response	135
5.3.2	Aim of the Work	136
5.3.3	Preliminary Analysis	138
5.3.4	Analysis of Variance	142
5.3.5	Results and Discussion	143
5.4	Principal Stress-Induced Variations	145
5.4.1	Aim of the Work	145
5.4.2	Principal Component Analysis	146
5.4.3	Results and Discussion	148
6	Main Achievements and Outlook	153
6.1	Optimal Analgesics Administration in Postoperative Care	154
6.2	Optimal Analgesics Administration in Conscious Sedation	155
6.3	Optimal Analgesics Administration in General Anesthesia	157
