Table of contents (brief)

Summary	ix
Acknowledgements	xiii
Abbreviations	xv
1 Introduction	1
2 The (ir)relevance of crop yield gaps in developing countries	10
3 Conceptual frame and analytical approach.....	30
4 General methodology	40
5 Generation of landscapes and agent populations	53
6 Crop yield and soil property dynamics.....	72
7 Production behavior	90
8 Consumption behavior	118
9 Simulation results	138
10 Discussion.....	158
References	164
Appendix	184
Table of authorities	204

Table of contents (detailed)

Summary	ix	
Acknowledgements	xiii	
Abbreviations	xv	
1	Introduction	1
1.1	Introduction	1
1.2	Problem background	1
1.2.1	<i>The crop yield gap and food security</i>	1
1.2.2	<i>The crop yield potential</i>	2
1.2.3	<i>Need for integrated approaches</i>	4
1.3	Objectives	7
1.4	Approach	7
1.4.1	<i>Main methodological contributions</i>	7
1.4.2	<i>Main collaborations</i>	8
1.5	Outline of the thesis	9
2	The (ir)relevance of crop yield gaps in developing countries	10
2.1	Introduction	10
2.2	The crop yield gap	10
2.2.1	<i>The yield gap concept</i>	10
2.2.2	<i>Background</i>	12
2.2.3	<i>The yield gap debate</i>	12
2.3	Misconceptions about crop yield gaps	14
2.3.1	<i>'Farmers want a higher yield potential'</i>	14
2.3.2	<i>'A higher yield potential is needed to meet future demands'</i>	16
2.3.3	<i>'A higher yield potential increases food security'</i>	18
2.3.4	<i>'A higher yield potential is needed to keep prices low'</i>	21
2.4	More than genes	22
2.4.1	<i>The importance of creating an enabling environment</i>	22
2.4.2	<i>The limited relevance of national average yields</i>	24
2.5	Summary	29

3	Conceptual frame and analytical approach.....	30
3.1	Introduction.....	30
3.2	Decomposing crop yield gaps.....	31
3.2.1	<i>Proximate factors</i>	31
3.2.2	<i>Underlying factors.....</i>	32
3.3	Socioeconomic dimensions of the yield gap	34
3.3.1	<i>Private objectives</i>	34
3.3.2	<i>Social objectives.....</i>	36
3.4	Application to Uganda	37
3.4.1	<i>Southeast Uganda</i>	37
3.4.2	<i>Maize in Uganda</i>	38
3.5	Summary.....	39
4	General methodology	40
4.1	Introduction.....	40
4.2	Methodological approach	40
4.2.1	<i>Heterogeneity</i>	40
4.2.2	<i>Mathematical programming-based multi-agent systems (MP-MAS)...</i>	41
4.3	Introduction of system components.....	42
4.3.1	<i>Farm agents</i>	42
4.3.2	<i>Landscape</i>	43
4.3.3	<i>Biophysics</i>	43
4.4	Heterogeneity, interaction, and dynamics	43
4.4.1	<i>Heterogeneity</i>	44
4.4.2	<i>Interaction.....</i>	44
4.4.3	<i>Dynamics</i>	45
4.5	Mixed integer linear programming (MILP)	46
4.5.1	<i>Non-separable farm decision-making</i>	46
4.5.2	<i>Concise theoretical model</i>	47
4.6	A three-stage non-separable decision process	48
4.6.1	<i>Investments</i>	49
4.6.2	<i>Production</i>	50
4.6.3	<i>Consumption.....</i>	50
4.7	Software implementation.....	51
4.8	Summary.....	51

5	Generation of landscapes and agent populations	53
5.1	Introduction.....	53
5.2	The landscape	53
5.2.1	<i>Data Sources</i>	54
5.2.2	<i>The villages of Magada and Buyemba</i>	54
5.2.3	<i>Landscape representation</i>	56
5.2.4	<i>Location of agents and farm plots (layers 1-3)</i>	57
5.2.5	<i>The socioeconomic landscape (layers 4-5).....</i>	59
5.2.6	<i>Soil chemical properties (layers 6-10).....</i>	60
5.2.7	<i>Soil physical properties (layers 11-12).....</i>	61
5.3	The agents	62
5.3.1	<i>Data Sources</i>	62
5.3.2	<i>Generating an agent population</i>	62
5.3.3	<i>Random data generation.....</i>	63
5.3.4	<i>Consistency checks</i>	65
5.4	Validation of results	66
5.4.1	<i>Population level.....</i>	67
5.4.2	<i>Cluster level.....</i>	68
5.4.3	<i>Agent level</i>	69
5.5	Summary.....	71
6	Crop yield and soil property dynamics.....	72
6.1	Introduction.....	72
6.2	Background	72
6.2.1	<i>Problem background</i>	72
6.2.2	<i>Theoretical background</i>	73
6.2.3	<i>The Tropical Soil Productivity Calculator (TSPC)</i>	74
6.3	Four phases in soil property dynamics	75
6.3.1	<i>Phase 1: yield determinants</i>	75
6.3.2	<i>Phase 2: crop yield</i>	79
6.3.3	<i>Phase 3: soil property updating</i>	80
6.3.4	<i>Phase 4: soil property balances</i>	83
6.4	Model calibration.....	84
6.4.1	<i>Crops included</i>	84
6.4.2	<i>Crop physical characteristics</i>	84
6.4.3	<i>Crop chemical characteristics</i>	86
6.4.4	<i>Crop yield response functions</i>	86
6.5	Validation of results	88
6.6	Summary.....	89

7	Production behavior	90
7.1	Introduction.....	90
7.2	Crop yield response to labor use	90
7.2.1	<i>Frontier production function</i>	90
7.2.2	<i>Production data used.....</i>	92
7.2.3	<i>Model estimates</i>	92
7.2.4	<i>Labor response factor.....</i>	93
7.3	The diffusion of innovations	94
7.3.1	<i>Theoretical background</i>	94
7.3.2	<i>Empirical application</i>	95
7.4	Agent yield expectations	96
7.4.1	<i>Theoretical background</i>	96
7.4.2	<i>Empirical application</i>	97
7.5	Production of livestock, coffee, vegetables and fruits	99
7.5.1	<i>Livestock production</i>	99
7.5.2	<i>Coffee production</i>	101
7.5.3	<i>Fruit and vegetable production</i>	102
7.6	Further constraints and incentives to production	103
7.6.1	<i>Labor availability</i>	103
7.6.2	<i>Labor time allocation.....</i>	105
7.6.3	<i>Labor allocation by gender</i>	106
7.6.4	<i>Rotational constraints.....</i>	107
7.6.5	<i>Intercropping</i>	108
7.6.6	<i>Crop pests and diseases</i>	111
7.6.7	<i>Risk</i>	112
7.6.8	<i>Input prices</i>	112
7.7	Validation of results	113
7.8	Summary.....	117

8	Consumption behavior	118
8.1	Introduction.....	118
8.2	A three-step budgeting process	118
8.2.1	<i>Theoretical background</i>	118
8.2.2	<i>Theoretical model</i>	119
8.2.3	<i>Savings and expenditures (Step 1).....</i>	121
8.2.4	<i>Food and non-food expenditures (Step 2).....</i>	121
8.2.5	<i>Almost Ideal Demand System (Step 3)</i>	122
8.2.6	<i>Quantifying poverty from food energy needs and intake levels</i>	124
8.2.7	<i>Coping strategies to food insecurity.....</i>	125
8.2.8	<i>Fertility and mortality.....</i>	126
8.3	Data and estimation.....	127
8.3.1	<i>Budget data used</i>	127
8.3.2	<i>Savings and expenditures (Step 1).....</i>	127
8.3.3	<i>Food and non-food expenditures (Step 2).....</i>	128
8.3.4	<i>Almost Ideal Demand System (Step 3)</i>	128
8.3.5	<i>Market prices</i>	129
8.3.6	<i>Food energy needs and intake levels</i>	130
8.3.7	<i>Opportunity cost of farm labor and migration.....</i>	132
8.3.8	<i>Population growth and HIV/Aids.....</i>	133
8.4	Validation of results	134
8.5	Summary.....	137
9	Simulation results	138
9.1	Introduction.....	138
9.2	The baseline scenario.....	138
9.2.1	<i>Defining the baseline scenario</i>	138
9.2.2	<i>Sensitivity of the baseline to initial conditions</i>	138
9.2.3	<i>Baseline dynamics: soil fertility decline and population growth</i>	140
9.3	The maize yield gap	143
9.3.1	<i>Decomposition in proximate factors.....</i>	143
9.3.2	<i>The maize yield gap and farm performance</i>	144
9.3.3	<i>The maize yield gap vs. economic well-being and food security</i>	146
9.3.4	<i>Maize yield gap dynamics.....</i>	148
9.3.5	<i>Decomposition in underlying factors</i>	152
9.4	The impact of crop breeding.....	154
9.5	The effect of HIV/Aids	156
9.6	Summary.....	157

10	Discussion.....	158
10.1	Introduction.....	158
10.2	Limitations of the study	158
10.2.1	<i>Low data quality</i>	158
10.2.2	<i>Migration</i>	158
10.2.3	<i>Sources of heterogeneity</i>	159
10.2.4	<i>Unknown crop yield response functions</i>	159
10.2.5	<i>Absence of local factor and output markets.....</i>	159
10.3	An ex-post comparison of approaches	159
10.4	Recommendations for research	162
