

Thomas Feldmann (Autor)

**Biological, chemical and physiological studies on  
epiphytic asco- and deuteromycetes as causal  
organisms of sooty blotch and pink rot in apple fruit**

## Table of Contents

<b>Abbreviations</b>	V
<b>Glossary</b>	VI
<b>A Introduction</b>	1
<b>B Biological characterisation of sooty blotch fungi in apple (<i>Malus x domestica</i> Borkh.) of Central Europe</b>	6
<b>1. INTRODUCTION</b>	6
1.1 Significance of sooty blotch in apple	6
1.2 State of knowledge on pathogens causing sooty blotch disease in apple ( <i>Malus x domestica</i> Borkh.)	6
1.3 Sooty blotch and sooty moulds in other fruit species	8
<b>2. MATERIAL AND METHODS</b>	9
2.1 Fungal culture collection	9
2.1.1 Designation of the cultures	9
2.1.2 Preparation of culture media	9
2.1.3 Cultivation of the fungi	9
2.2 Fungal cultures	9
2.2.1 Macroscopic documentation of fungal cultures	9
2.2.2 Microscopic presentation of different organs of fungal cultures	9
2.2.3 Statistical analysis of fungal characters	10
2.3 Collection of growth of fungal cultures	10
<b>3. RESULTS</b>	10
3.1 Classification and description of fungal cultures of sooty blotch fungi isolated from apple by use of classical mycological methods	10
3.2 Statistical analysis of morphological observations and measurements	21
<b>4. DISCUSSION</b>	22
<b>5. SUMMARY AND CONCLUSION</b>	25
<b>6. REFERENCES</b>	27

<b>C</b>	<b>Classification of sooty blotch fungi in apple (<i>Malus x domestica</i> Borkh.) based on the analysis of ribosomal DNA</b>	<b>30</b>
1.	<b>INTRODUCTION</b>	<b>30</b>
1.1	Historical review on the causal organisms of sooty blotch	30
1.2	Aims and scope	31
2.	<b>MATERIAL AND METHODS</b>	<b>31</b>
2.1	Origin of fungal isolates	31
2.2	Polymerase chain reaction and sequencing	31
2.3	ITS and LSU database	32
2.4	Sequence alignment and phylogenetic analysis	32
3.	<b>RESULTS</b>	<b>32</b>
3.1	Phylogenetic placement based on rDNA LSU sequences	32
3.2	Putative species designation based on rDNA ITS 1+2 sequences	35
3.3	Number of species, affiliation of genus and order, identification as well as taxonomic concept of German sooty blotch fungi	41
4.	<b>DISCUSSION</b>	<b>41</b>
4.1	Molecular analyses	41
4.2	Comparison of molecular and morphological characters of chapter B	44
5.	<b>SUMMARY AND CONCLUSION</b>	<b>46</b>
6.	<b>REFERENCES</b>	<b>47</b>
<b>D</b>	<b>Occurrence of mycotoxins in apple infested with sooty blotch disease</b>	<b>49</b>
1.	<b>INTRODUCTION</b>	<b>49</b>
1.1	Sooty blotch disease of apple	49
1.2	Trichothecenes	49
1.2.1	Classification and structure	49
1.2.2	Biosynthesis of the trichothecenes	50
1.2.3	Toxicity, legislation and tolerance levels	51
1.3	Analytical detection	53
1.3.1	Criteria of choice for the analytical method	53
1.3.2	Suitability of HPLC/MS/MS for the detection of trichothecenes	54
1.4	Aims and scope	54

<b>2. MATERIAL AND METHODS</b>	<b>55</b>
2.1 Analytical method HPLC/MS/MS	55
2.1.1 Chemicals, reagents and standard preparation	55
2.1.2 Chromatography	55
2.1.3 Mass spectrometry	56
2.1.4 Quantification	57
2.2 Fungal culture collection	58
2.2.1 Designation of the pathogens and/or fungal isolates	58
2.2.2 Preparation of the culture media	59
2.2.3 Cultivation of the fungi	59
2.3 Analysis of liquid cultures of the fungal isolates	60
2.3.1 Selection of fungal isolates and preparation of liquid cultures	60
2.3.2 Sample preparation and extraction	60
2.4 Analysis of apples inoculated with sooty blotch pathogens	61
2.4.1 Selection of fungal isolates and inoculation of apples	61
2.4.2 Freeze drying and grinding procedure	61
2.4.3 Sample preparation and extraction	62
2.5 Analysis of fresh apple peels with symptoms of sooty blotch disease	62
2.5.1 Sampling, sample preparation and extraction	62
2.6 Apple juice analysis	62
2.6.1 Sample selection	62
2.6.2 Sample preparation and extraction	63
2.7 Analysis of apple sauce	63
2.7.1 Sample selection	63
2.7.2 Sample preparation and extraction	63
<b>3. RESULTS</b>	<b>63</b>
3.1 HPLC/MS/MS analysis	63
3.1.1 Sample preparation and extraction	63
3.1.2 Separation and detection employing HPLC-ESI(-/+)-MS/MS	64
3.2 Analysis of liquid cultures of fungal isolates	65
3.3 Occurrence of mycotoxins in apples inoculated with sooty blotch pathogens	66
3.4 Analysis for mycotoxins in peels of fresh apples with symptoms of sooty blotch	67
3.5 Analysis for mycotoxins in apple juices	68
3.6 Analysis for mycotoxins in apple sauce	68
<b>4. DISCUSSION</b>	<b>69</b>

<b>5. SUMMARY AND CONCLUSION</b>	<b>71</b>
<b>6. REFERENCES</b>	<b>73</b>
<b>E Growth and mycotoxin synthesis of <i>Trichothecium roseum</i> (Pers.) Link as affected by temperature, nutrient deficiency and sublethal fungicide doses</b>	<b>75</b>
<b>1. INTRODUCTION</b>	<b>75</b>
<b>2. MATERIAL AND METHODS</b>	<b>76</b>
2.1 Media and composition	76
2.1.1 Fungicide tests	76
2.1.2 Temperature tests	76
2.1.3 Nutrient deficiency tests	77
2.2 Growth evaluation of <i>Trichothecium roseum</i>	77
2.3 Sample preparation and extraction	78
2.4 Chemicals and reagents	78
2.5 Chromatography	78
2.6 Mass spectrometry	79
2.7 Statistical analysis	79
<b>3. RESULTS</b>	<b>79</b>
3.1 Effects of fungicides	79
3.2 Temperature effects	82
3.3 Effects of nutrient deficiency	83
<b>4. DISCUSSION</b>	<b>85</b>
<b>5. SUMMARY AND CONCLUSION</b>	<b>89</b>
<b>6. REFERENCES</b>	<b>91</b>
<b>F Summary and Conclusion</b>	<b>94</b>
