TABLE OF CONTENTS

1	GENERAL INTRODUCTION	1
1.1	Introduction	1
1.2	Research justification	5
1.3	Thesis outline.....	6
2	GENERAL DESCRIPTION OF METHODS AND MATERIALS.....	7
2.1	Description of the study area.....	7
2.1.1	Climate and vegetation	7
2.1.2	Geology, soil and land cover	9
2.2	Energy fluxes and actual evaporation.....	9
2.2.1	Definition of the different form of evaporation	10
2.2.2	Factors influencing energy fluxes and actual evaporation.....	10
2.2.3	Measurement techniques.....	11
2.3	Surface runoff.....	16
2.3.1	Factors influencing surface runoff.....	16
2.3.2	Measurement techniques.....	18
3	ENERGY BALANCE CLOSURE AND FOOTPRINT ANALYSIS	20
3.1	Introduction	20
3.2	Methods and materials.....	22
3.2.1	Trial site	22
3.2.2	Energy balance closure	22
3.2.3	Footprint analysis.....	27
3.3	Results and discussions`	28
3.3.1	Energy balance closure	28
3.3.2	Footprint analysis.....	32
3.4	Conclusion.....	36
4	INTER-ANNUAL ENERGY PARTITIONING OVER THE WEST AFRICAN SAVANNA: EVAPORATION AND SURFACE CONDUCTANCE MEASUREMENTS AND MODELING.....	37
4.1	Introduction	37
4.2	Methods and materials.....	38
4.2.1	Trial site	38
4.2.2	Collection of micrometeorological data.....	39
4.2.3	Modeling the evaporation and surface conductance	44
4.3	Results	44
4.3.1	Seasonal dynamic of meteorological parameters.....	45
4.3.2	Roughness length for momentum and vegetation dynamics	47
4.3.3	Surface conductance and decoupling coefficient.....	49
4.3.4	Sensible and latent heat flux	54
4.3.5	Principal Component Analysis (PCA) and modeling	59
4.4	Conclusion.....	68

5	EFFECT OF SEASONAL DYNAMICS OF VEGETATION COVER ON LAND SURFACE MODELS.....	70
5.1	Introduction	70
5.2	Model description	71
5.3	Method.....	76
5.4	Results and discussion	78
5.4.1	Comparison at seasonal basis.....	78
5.4.2	Comparison on a daily basis (drying period).....	82
5.4.3	Comparison on a daily basis (wet period).....	84
5.4.4	Cause of insensitivity and proposed improvement	86
5.5	Conclusion and recommendations.....	90
6	SEASONAL AND DIURNAL DYNAMICS OF SURFACE ALBEDO: IMPACT ON ACTUAL EVAPORATION AND MODELING.....	93
6.1	Introduction	93
6.2	Trial site.....	94
6.3	Methods and materials.....	96
6.3.1	Modeling of sheanut albedo.....	97
6.3.2	Modeling of crop albedo.....	101
6.4	Results and discussions	103
6.4.1	Seasonal trend of albedo	103
6.4.2	Effect of seasonal dynamics on actual evaporation	104
6.4.3	Diurnal trend of albedo	106
6.5	Model evaluation	111
6.5.1	Sheanut tree albedo	111
6.5.2	Sorghum albedo	113
6.6	Conclusion.....	114
7	IMPACT OF LAND-USE INTENSITY ON SURFACE RUNOFF: MEASURED SCALE EFFECT ON THREE SMALL WATERSHEDS.....	115
7.1	Introduction	115
7.2	Trial sites	116
7.3	Methods and materials.....	118
7.3.1	Monitoring of the rainfall.....	118
7.3.2	Measurement on a plot scale.....	118
7.3.3	Measurement on a watershed scale.....	119
7.4	Results and discussions	120
7.4.1	Reduction of runoff coefficient.....	121
7.4.2	Estimation of annual total runoff on watersheds scale	127
7.5	Conclusion.....	135

8	SUMMARY AND RECOMMENDATIONS	136
8.1	Summary.....	136
8.1.1	Energy balance closure and footprint analysis.....	136
8.1.2	Inter-annual energy partitioning	137
8.1.3	Seasonal dynamics of vegetation cover and land surface models	138
8.1.4	Seasonal dynamics of surface albedo	139
8.1.5	Land-use and surface runoff	140
8.2	Conclusion and recommendations.....	141
9	REFERENCES	143
