1	Introduction	1
2	Theoretical backgrounds	5
2.1	Spectral Domain Approach for multilayer configurations	6
2.1.1	Integral equations in space and spectral domain	8
2.1.2	Evaluation of the Green's function	10
2.1.3	Current function	13
2.1.4	Method of solution	18
2.1.5	Excitation by a plane wave	21
2.2	Grating equation	22
2.3	Convergence and accuracy of the numerical results	28
2.4	Investigation of single layer and multilayer configurations	34
3	Multifunctional printed reflectarray antennas	39
3.1	Basic idea of planar folded reflectarray antenna	40
3.1.1	Design of a printed reflectarray	43
3.2	Investigation of a single layer folded reflectarray antenna	45
3.2.1	Full-wave calculation technique	46
3.2.2	Antenna characteristics	47
3.3	Double and triple folded reflector antennas for 60 GHz	53
3.3.1	Principle and design of a double folded antenna	53
3.3.2	Triple folded reflector antenna	56
3.4	Dual frequency antennas	57
3.4.1	A dual frequency antenna for 60 GHz/900 MHz	58
3.5	Antennas for mm-wave automotive radar systems	61
3.5.1	Multibeam antennas	62
3.5.2	Folded reflector antenna for 76.5 GHz with three different feeds	63
3.6	A 27.6 GHz folded reflector antenna combined with a quasi-optical filter	65
3.6.1	Principle and design of a quasi-optical filter	65
3.6.2	Folded reflector antenna with integrated quasi-optical filter	67
3.7	Multilayer reflector antennas	70
3.7.1	Extending single layer reflectors to twolayer ones	70
3.7.2	A twolayer 58 GHz offset reflector antenna	72
3.7.3	A twolayer 58 GHz folded reflector antenna	78

4	Planar antenna based on a planar PBG structure	83
4.1	Basic properties and applications of photonic band gap structures . . .	83
4.2	Gain enhancement methods for single antenna elements	85
4.3	Design of a novel PBG Antenna in the Ka-band	87
4.4	Reduction of the height of the novel antenna	95
4.5	Optimization of the novel antenna	100
5	Summary	105
A	Immittance approach	107
B	Green functions for the configurations used in this work	111
B.1	General equations	111
B.2	Single layer configuration	112
B.3	Single layer without backside metallization	113
B.4	Twolayer configuration	114
C	System equation	117
	Bibliography	119
